Mountain Goat Recipe:

The Opera of Bartolomeo Scappi (1570) Terence Scully, 2011-01-22 Bartolomeo Scappi c 1500-1577 was arguably the most famous chef of the Italian Renaissance. He oversaw the preparation of meals for several Cardinals and was such a master of his profession that he became the personal cook for two Popes. At the culmination of his prolific career, he compiled the largest cookery treatise of the period to instruct an apprentice on the full craft of fine cuisine: its methods, ingredients, and recipes. Accompanying his book was a set of unique and precious engravings that show the ideal kitchen of his day, its operations, and myriad utensils, and are exquisitely reproduced in this volume. Scappi's Opera presents more than one thousand recipes along with menus that comprise up to a hundred dishes, while also commenting on a cook's responsibilities. Scappi also included a fascinating account of a pope's funeral and the complex procedures for feeding the cardinals during the ensuing conclave. His recipes inherit medieval culinary customs but also anticipate modern Italian cookery with a segment of 230 recipes for pastry of plain and flaky dough, torte, ciambelle, pastizzi, crostate, and pasta, tortellini, tagliatelli, struffoli, ravioli, pizza. Terence Scully presents the first English translation of the work. His aim is to make the recipes and the broad experience of this sophisticated papal cook accessible to a modern English audience interested in the culinary expertise and gastronomic refinement within the most civilized niche of Renaissance society. *The L.L. Bean Game and Fish Cookbook* Donald Angus Cameron, Judith Jones, 1983. Contains all the information a cook, hunter, angler needs to prepare hearty game and fish meals in camp or at home. There are detailed and illustrated instructions for all procedures needed to prepare and cook game and fish. Over 800 recipes included. *Perplexing Remedies in Ancient Medicine* Maddalena Rumor, 2024-11-18. The topic of a potential relationship between Babylonian and Greco-Roman medicine has been discussed for a long time, yet it is notoriously difficult to give it flesh and bones by means of concrete examples. The main goal of this study is to identify real elements in the therapeutical traditions of the one system that can be connected to those of the other, which would confirm a certain degree of practical knowledge sharing between the two cultures. By analyzing Dreckapothek's filthy medicaments and similarly perplexing medical ingredients, and by exploiting the concept of misunderstandings in translation, I show how elements of Assyro-Babylonian therapy were still present or emerging in the pharmaceutical compositions of the Early Roman Empire, ultimately supporting the idea of at least occasional transfers of medical knowledge between the two cultures. With its positive findings, this study contributes to a broader reconstruction of the context within which ancient medicine developed. It also finds reciprocal explanations of obscure passages and fuels further questions regarding the medical interrelations/interconnections between these neighboring ancient cultures. **The Goat World**, 1929. *Alpine Cooking* Meredith Erickson, 2019-10-15.
