### **Trans-jurisdictional Water Law and Governance** Janice Gray, Cameron Holley, Rosemary Rayfuse, 2016-06-23

Governance of global water resources presents one of the most confounding challenges in contemporary natural resource governance. With considerable government, citizen and financial donor attention devoted to a range of international, transnational and domestic laws and policies aimed at protecting and sustainably using fresh and coastal marine water resources, this book proposes that sustainable water outcomes require a trans-jurisdictional approach to water governance. Focusing on the concept of trans-jurisdictional water governance, the book diagnoses barriers and identifies pathways to coherent and coordinated institutional arrangements between and across different bodies of laws at local, national, regional and international levels. It includes case studies from the European Union, Australia, New Zealand, South Africa, the United States and Southeast Asia. Leading specialists offer insights into the pretence and the promise of trans-jurisdictional water governance and provide readers including students, practitioners, policy makers and academics with a basis for better analysing, articulating and synthesising standards of good trans-jurisdictional water governance both in theory and in practice. Dissatisfaction has matured in Africa and elsewhere around the fact that often the dominant frameworks for interpreting the continent's past are not rooted on the continent's value system and philosophy. This creates knowledge that does not make sense especially to local communities. The big question therefore is: can Africans develop theories that can contribute towards the interpretation of the African past using their own experiences? Framed within a concept revision substrate, the collection of papers in this thought-provoking volume argues for concept revision as a step towards decolonizing knowledge in the post-colony. The various papers powerfully expose that cleansed knowledge is not only locally relevant; it is also locally accessible and globally understandable. ### **Conservation Agriculture for Africa** Amir H Kassam, Saidi Mkomwa, Theodor Friedrich, 2016-12-14

Tillage agriculture has led to widespread soil and ecosystem degradation globally. This is especially so in Africa where traditional and modern tillage-based agricultural practices have become unsustainable due to severe disturbance and exploitation of natural resources with negative impacts on the environment and rural livelihoods. In addition, agriculture in Africa today faces major challenges including increased costs of production and energy, the effects of climate change and the lack of an effective

paradigm for sustainable intensification especially for small and medium size holdings Africa is facing a serious challenge to food security and as a continent has not advanced towards eradicating hunger In addition the population is still growing much faster than on most other continents This pressure has led to the emergence of no till conservation agriculture as a serious alternative sustainable agriculture paradigm In Africa in recent years conservation agriculture techniques and methods have spread to many countries as greater development education and research effort are directed towards its extension and uptake This book is aimed at agricultural researchers and scientists educationalists and agricultural service providers institutional leaders and policy makers working in the fields of sustainable agriculture and international development and also at agroecologists conservation scientists and those working on ecosystem services
