Mount Kenya University Intake May 2015:

Lawyers in 21st-Century Societies Richard L Abel, Ole Hammerslev, Hilary Sommerlad, Ulrike Schultz, 2020-04-02 The world's legal professions have undergone dramatic changes in the 30 years since publication of the landmark three volume *Lawyers in Society* which launched comparative sociological studies of lawyers. This is the first of two volumes in which scholars from a wide range of disciplines, countries and cultures document and analyse those changes. The present volume presents reports on 46 countries with broad coverage of North America, Western Europe, Latin America, Asia, Australia, North Africa and the Middle East, sub-Saharan Africa and former communist countries. These national reports address the impact of globalisation and neoliberalism on national legal professions, the relationship of lawyers and their professional associations to the state and tensions between state and citizenship, changes in lawyer demography, rapidly growing numbers and the profession's efforts to retain control, the entry of women and obstacles to full gender equality, ethnic diversity, legal education, the proliferation of institutions and pedagogic innovation, the regulation of lawyers, structures of production, especially the growth of large firms and the impact of technology and paraprofessionals, the distribution of lawyers across roles and access to justice, state funded legal aid and pro bono services. The juxtaposition of the reports reveals the dramatic transformations of professional rationales, labour markets and working practices and the multiple contingencies of the role of lawyers in societies experiencing increasing juridification within a new geopolitical order.

Feast your Eyes: Diet and Nutrition for Optimal Eye Health Arunkumar Ranganathan, Pinakin Gunvant Davey, 2025-04-17 Despite extensive research into the role of nutrition and diet for human health, the potential impact of what we eat on what we see is often overlooked. Yet living and working later into life, the frequency of eye diseases and age-related ocular conditions is on the rise. This includes cataracts, glaucoma and age-related macular degeneration (AMD), all of which are some of the leading causes of blindness worldwide. Furthermore, with growing cases of diabetes and obesity, retinal damage caused by diabetic retinopathy is becoming an increasingly global problem. Such conditions are multifactorial and complex. Nevertheless, studies have demonstrated a clear involvement of oxidative stress and free radical damage as causative to these conditions. Various nutrients have therefore been investigated for their potential preventative and therapeutic applications in the protection of retinal cells and overall eye health. Dietary antioxidants such as vitamin E, the carotenoids beta-carotene, lutein and zeaxanthin, and retinoids play a crucial role in protecting the eyes from UV sunlight damage and are linked with reduced risk of cataracts and AMD. Other nutrients such as zinc, iron, selenium, omega-3 fatty acids and vitamin C have also been implicated in eye health, with the latter of particular interest in glaucoma prevention and treatment.
