Negotiating Identities in Contemporary Africa Toyin Falola, Emmanuel M. Mbah, 2023-08-29 Negotiating Identities in Contemporary Africa Gender Religion and Ethno cultural Identities explores the changing dynamics of identities in Africa with a focus on gender ethno cultural and religious identity Toyin Falola and Emmanuel M Mbah argue that because identity defines who we are as individuals or groups studies on African identities must focus on understanding the changing dynamics in the socio economic and political spheres in the continent These chapters cover subjects such as women s career identity gender roles and knowledge childlessness ethnocentrism and democracy cultural identity through theater Black identity in the diaspora and diasporic consciousness Using existing scholarship the chapters in this edited volume challenge our understanding of what identity entails and provide new discussions on the hitherto politicized historiography of some identities in Africa

Local, Traditional and Indigenous Food Systems in the 21st Century to Combat Obesity, Undernutrition and Climate Change, 2nd edition Rebecca Kanter, Sofia Boza, Gina Kennedy, 2023-07-31 Traditional and indigenous food systems have existed for centuries and were in balance with local food supplies globally However between the mid 20th and early 21st century the green revolution dramatically altered food production which in turn affected the inclusivity of traditional production systems within food systems and subsequently traditional dietary intakes This change was accompanied by lifestyle changes and spurred a global nutrition transition Today the world faces a global syndemic of obesity undernutrition and climate change A new call to action to create food systems that nourish people and sustain the planet is needed Traditional and indigenous food systems have long been recognized as systems that can both support good human nutrition as well as maintain a balance with nature There is an underutilized knowledge base around traditional and indigenous food systems This includes the knowledge of nutritious species traditional culinary preparations and cultural practices Greater agricultural production of underutilized species can result in more sustainable agricultural and food systems which can also help improve livelihoods and food security Traditional and indigenous cultural practices with respect to both land and water management as well as culinary practices contribute to both sustainable food production and consumption These practices require a greater evidence base in order to be incorporated into public health nutrition initiatives related to improving dietary quality such as food based dietary guidelines for example An increased focus on the importance of local traditional and indigenous food systems and nutrition could therefore help countries to improve human nutrition and ideally help mitigate the global syndemic of obesity undernutrition and climate change This Research Topic will focus on documenting diverse local food systems and promoting elements within them that can help improve nutrition and health both human and planetary in various ways including the livelihood development of knowledge holders New Challenges and Future Perspectives in Nutrition and Sustainable Diets in Africa Hettie Carina Schönfeldt, Gloria Essilfie, Yunyun Gong, 2024-05-06 Africa is confronted with the triple burden of malnutrition it is also faced with the triple

challenges of poverty inequality and unemployment In many African countries large proportions of the population rely on agriculture not only for their food but also for their livelihoods A transformed agricultural and food system is thus a necessary condition for addressing this double triple challenge Additionally post harvest and food waste and losses reduce the availability of sufficient quantities of safe edible and preferable foods At least one third of food produced at farm level is lost due to inappropriate storage infrastructure and agro processing technologies in developing countries and one third of food purchased is wasted at household and retail level

Nutrition and Sustainable Development Goal 10: Reduced Inequalities, 2nd edition Emmanuel Cohen,Norbert Amougou,Nobuo Nishi,Yuxuan Gu ,Nur Indrawaty Lipoeto,2025-03-03

Building on the Millennium Development Goals the UN Sustainable Development Goals SDGs are the cornerstone of the 2030 Agenda for Sustainable Development billed by the UN as an agenda of unprecedented scope and significance These seventeen goals are conceived as integrated indivisible and as balancing the economic social and environmental dimensions of sustainable development To be achieved by 2030 the goals are organized around five core pillars people planet prosperity peace and partnership As a member of the SDGs Publishers Compact Frontiers is committed to advocating the themes represented by the SDGs and accelerating progress to achieve them Nutrition sits at the heart of the SDGs In addition to achieving Zero Hunger SDG2 improvements in nutrition are critical to both achieve and reap the benefits of all seventeen global goals With good nutrition comes improved health and wellbeing SDG3 enhanced educational and work productivity SDGs 4 and 8 less poverty SDG1 and reduced inequalities SDGs 5 and 10 And with stronger and more sustainable environments communities and technologies SDGs 6 7 9 11 17 improved food security and nutrition will follow As part of an innovative collection showcasing nutrition in the context of the SDGs this Research Topic will focus on Sustainable Development Goal 10 Reduced Inequalities We welcome Original Research Review and Perspective articles covering topics including but not limited to Sociocultural aspects of health and wellbeing Socio ecological profiles of food consumption in urban populations Diversity of socio ecological profiles of food consumption in specific populations Assessing the frequency of socio ecological profiles of food consumption oriented to local and alternative food productions Sociodemographic characteristics of consumers using local food productions Barriers social economic geographic and cultural relative to dietary strategies mobilising local food productions Relationships between soil microbial diversity and practices in alternative agriculture food quality and the corresponding influence on human health and human microbiota diversity Assessing the real and the perceived impact of the effects of food in alternative agriculture on health

Global Food Systems, Diets, and Nutrition Jessica Fanzo,Claire Davis,2021-06-05 Ensuring optimal diets and nutrition for the global population is a grand challenge fraught with many contentious issues To achieve food security for all and protect health we need functional equitable and sustainable food systems Food systems are highly complex networks of individuals and institutions that depend on governance and policy leadership This book explains how interconnected food systems and policies affect diets and

nutrition in high middle and low income countries In tandem with food policy food systems determine the availability
 affordability and nutritional quality of the food supply which influences the diets that people are willing and able to consume
 Readers will become familiar with both domestic and international food policy processes and actors and they will be able to
 critically analyze and debate how policy and science affect diet and nutrition outcomes **Key nutrition and hydration**

Accessibility Sumit Chakravarty,Arun Jyoti Nath,Gopal Shukla,2024-01-17 Food security satisfies people s dietary needs by
 ensuring physical social and economic access to sufficient safe and nutritious food Nowadays food security is of prime
 importance because not only does it overcomes hunger poverty and malnutrition but it also determines the national security
 and political and economic sovereignty of states However according to the FAO report 2021 2 37 billion people nearly one in
 three people in the world did not have adequate food availability in 2020 The green revolution created an era of
 extraordinary food production worldwide but agriculture oriented developing countries face adverse impacts such as loss of
 ecosystem quality and biodiversity and environmental degradation Besides several challenges such as population growth
 pollution natural resource depletion agricultural land conversions and climate change are further developing concerns in
