Mouse Reaktion Books Animal:

Speaking for Animals Margo DeMello, 2013 This text contributes to the growing field of human animal studies by examining the human impulse evidenced in blogs social networking sites video games comic books and animal welfare literature to ventriloquize the animal voice

Animal Ethics for Veterinarians Andrew Linzey, Clair Linzey, 2017-08-15 Veterinarians serve on the front lines working to prevent animal suffering and abuse For centuries their compassion and expertise have improved the quality of life and death for animals in their care However modern interest in animal rights has led more and more people to ask questions about the ethical considerations that lie behind common veterinary practices This Common Threads volume drawn from articles originally published in the Journal of Animal Ethics JAE offers veterinarians and other interested readers a primer on key issues in the field Essays in the first section discuss aspects of veterinary oaths how advances in animal cognition science factor into current ethical debates and the rise of complementary and alternative veterinary medicine and its relationship to traditional veterinary medicine The second section continues with an essay that addresses why veterinarians have an obligation to educate animal caregivers to look past cuteness in order to treat all animals with dignity The collection closes with three short sections focusing on animals in farming trade and research areas where veterinarians encounter conflicts between their job and their duty to advocate and care for animals Contributors Judith Benz Schwarzburg Vanessa Carli Bones Grace Clement Simon Coghlan Priscilla N Cohn Mark J Estren Elisa Galgut Eleonora Gullone Matthew C Halteman Andrew Knight Drew Leder Andrew Linzey Clair Linzey Kay Peggs Megan Schommer Clifford Warwick and James W Yeates

The Ethical Case against Animal Experiments Andrew Linzey, Clair Linzey, 2017-12-21 At present human beings worldwide are using an estimated 115 3 million animals in experiments a normalization of the unthinkable on an immense scale In terms of harm pain suffering and death animal experiments constitute one of the major moral issues of our time Given today's deeper understanding of animal sentience the contributors to this volume argue that we must afford animals a special moral consideration that precludes their use in experiments The Ethical Case against Animal Experiments begins with the Oxford Centre for Animal Ethics's groundbreaking and comprehensive ethical critique of the practice of animal experiments A second section offers original writings that engage with and elaborate on aspects of the Oxford Centre report The essayists explore historical philosophical and personal perspectives that range from animal experiments in classical times to the place of necessity in animal research to one researcher's painful journey from researcher to opponent A devastating look at a contemporary moral crisis The Ethical Case against Animal Experiments melds logic and compassion to mount a powerful challenge to human cruelty

Picturing Animals in Britain, 1750-1850 Diana Donald, 2007-01-01 From fine art paintings by such artists as Stubbs and Landseer to zoological illustrations and popular prints a vast array of animal images was created in Britain during the century from 1750 to 1850 This highly original book investigates the rich meanings of these visual representations as well as the ways in which

animals were actually used and abused What Diana Donald discovers in this fascinating study is a deep and unresolved ambivalence that lies at the heart of human attitudes toward animals The author brings to light dichotomies in human thinking about animals throughout this key period awestruck with the beauty and spirit of wild animals people nevertheless desired to capture and tame them the belief that other species are inferior was firmly held yet at the same time animals in stories and fables were given human attributes though laws against animal cruelty were introduced the overworking of horses and the allure of sport hunting persisted Animals are central in cultural history Donald concludes and compelling questions about them then and now remain unanswered Gone Feral Casey Jean O'Reilly-Conlin,Andrea

O'Reilly,2025-03-01 *Gone Feral* Unruly Women and the Undoing of Normative Femininity is an edited collection that probes the concept of ferality as it relates to and intersects with traditional patriarchal dictates of normative femininity The collection appropriately is a creative hodge podge of feral representations and enactments that span multiple disciplines and social and existential dimensions and utilizes textual and intertextual analysis creative non fiction feminist theory critical animal studies literature media analysis poetry and artwork to explore the complex and contradictory nature of ferality as it exists within outside and on the margins of patriarchal culture Ultimately the collection seeks to understand and showcase how the concept of ferality may be understood as an inevitable consequence of and potential resistance to patriarchal culture and the dictates of normative femininity that have long snared feminine potential caged feminine spirits and neutered feminine authenticity *Animal Breeding, Welfare and Society* Jacky Turner,2010-08-12 The determination of when how often and with whom an animal breeds is moving rapidly away from evolutionary pressures and towards human purposes these include the breeding of around 50 billion mammals and birds for food production annually the breeding of pedigree dogs and cats racing dogs and horses specialised laboratory animal strains and the use of reproductive science to conserve endangered species or breeds and to limit unwanted populations of pests and non native species But the ethics and sustainability of this takeover of animals reproductive lives have been insufficiently examined by either professionals or the public This book discusses the methods the motivations and the consequences of human intervention in animal breeding in terms of animal health behaviour and well being It explores where we are now and the choices ahead and looks to a future where we have more respect for animals as sentient beings and where we could loosen the reins of reproductive control

The SAGE Handbook of Environment and Society Jules Pretty,Andy Ball,Ted Benton,Julia Guivant,David R Lee,David Orr,Max Pfeffer,Professor Hugh Ward,2007-10-30 A monumental and timely contribution to scholarship on society and environments The handbook makes it easy and compelling for anyone to learn about that scholarship in its full manifestations and as represented by some of the most highly respected researchers and thinkers in the English speaking world It is wide reaching in scope and far reaching in its implications for public and private action a definite must for serious researchers and their libraries Bonnie J McCay Rutgers University This is the desert island book for anyone interested in the relationship

between society and the environment The editors have assembled a masterful collection of contributions on every conceivable dimension of environmental thinking in the social sciences and humanities No library should be without it Robyn Eckersley University of Melbourne The SAGE Handbook of Environment and Society focuses on the interactions between people societies and economies and the state of nature and the environment Editorially integrated but written from multi disciplinary perspectives it is organised in seven sections Environmental thought past and present Valuing the environment Knowledges and knowing Political economy of environmental change Environmental technologies Redesigning natures Institutions and policies for influencing the environment Key themes include locations where the environment society relation is most acute where for example there are few natural resources or where industrialization is unregulated the discussion of these issues at different scales local regional national and global the cost of damage to resources and the relation between principal actors in the environment society nexus Aimed at an international audience of academics research students researchers practitioners and policy makers The SAGE Handbook of Environment and Society presents readers in social science and natural science with a manual of the past present and future of environment society links **Age as Disease** David-Jack Fletcher,2021-03-21 Age as Disease explores the foundations of gerontology as a discipline to examine the ways contemporary society constructs old age as a disease state Framed throughout as gerontological hygiene this book examines contemporary regimes strategies and treatment protocols deployed throughout Australia the United States and the United Kingdom The book deploys critical cultural theories such as biopolitics somatechnics ethics and governmentality to examine how anti aging technologies operate to problematise the aging body as always already diseased and how these come to constitute a movement of abolition named here as gerontological hygiene **Animals as Neighbors** Terry O'Connor,2013 For thousands of years humans have categorized animals as either domestic or wild And yet around the world a more nuanced relationship exists that of commensal animals species that have adapted to our homes our towns and our artificial landscapes finding ways to gain benefit from our activities and so becoming an important part of our everyday lives A fascinating investigation this text draws on archaeological records to explore human animal relations *ECOS* ,2005
