Moving Health Sovereignty In Africa Global Environmental Governance:

Moving Health Sovereignty in Africa Andrew F. Cooper, Hany Besada, 2016-04-15 Today's era of intense globalization has unleashed dynamic movements of people, pathogens and pests that overwhelm the static territorial jurisdictions on which the governance provided by sovereign states and their formal intergovernmental institutions is based. This world of movement calls for new ideas and institutions to govern people's health, above all in Africa where the movements and health challenges are the most acute. This book insightfully explores these challenges in ways that put the perspectives of Africans themselves at centre stage. It begins with the long central and still compelling African health challenge of combating the pandemic of HIV/AIDS. It then examines the global governance responses by the major multilateral organizations of the World Bank and the World Trade Organization and the newer informal flexible democratically oriented ones of the Group of Eight. It also addresses the compounding health challenge created by climate change to assess both its intensifying impact on Africa and how all international institutions have largely failed to link climate and health in their governance response. It concludes with several recommendations about the innovative ideas and institutions that offer a way to closing the great global governance gaps and thus improving Africans' health and that of citizens beyond. **Moving Health Sovereignty in Africa**, 2014

The Global Governance of Genetic Resources Florian Rabitz, 2017-04-28 Multi-institutional governance architectures are increasingly common in world politics yet how do they evolve over time? This book develops a fresh conceptual approach by distinguishing two main types of institutional change and by proposing the strategic context within which governments make decisions regarding international cooperation as the main driving factor. Applying this theoretical framework to the case of genetic resources, it shows how the scope for change has persistently been circumscribed by asymmetries in the global biotechnology sector. Taking a broad view of the underlying technological, legal and economic factors, the book analyzes the formation of international regimes linking access to genetic resources to the fair and equitable sharing of the benefits arising out of their utilization. Covering negotiations in the areas of seeds, intellectual property rights, pandemic influenza viruses and marine genetic resources, the author shows how governments have persistently faced the problem of ensuring cooperation among actors with widely differing interests. This led them to opt for a strategy of institutional layering whereby new international instruments are gradually built upon pre-existing ones. In addition to giving a comprehensive overview of the international governance of Access and Benefit sharing within the wider context of modern biotechnology, the argument developed here enables a new perspective for studying institutional change in multi-institutional governance architectures.

The Global Governance of Climate Change John J. Kirton, Ella Kokotsis, 2016-03-03 Climate change control has risen to the top of the international agenda. Failed efforts centred in the United Nations to allocate responsibility have resulted in a challenge now reaching crisis stage. John J. Kirton and Ella Kokotsis analyse the generation and effectiveness of four decades of intergovernmental regimes for controlling global climate change. Informed by international relations theories and critical

of the prevailing UN approach Kirton and Kokotsis trace the global governance of climate change from its 1970s origins to the present and demonstrate the effectiveness of the plurilateral summit alternative grounded in the G7 8 and the G20 Topics covered include G7 8 and UN competition and convergence on governing climate change Kyoto obligations and the post Kyoto regime The role of the G7 8 and G20 in generating a regime beyond Kyoto Projections of and prescriptions for an effective global climate change control regime for the twenty first century This topical book synthesizes a rich array of empirical data including new interview and documentary material about G7 8 and G20 governance of climate change and makes a valuable contribution to understanding the dynamics of governing climate change It will appeal to scholars researchers and policy makers interested in the dynamics behind governance processes within the intergovernmental realm

Israeli Development Aid to Sub-Saharan Africa Karolina Zielińska, 2021-03-01 This book deals with Israeli development aid to Sub Saharan Africa countries as a part of Israeli foreign policy The analysis is framed by the concept of soft power an assumption that development cooperation increases attractiveness of the donor and contributes to constructive bilateral and multilateral relations Israel is a particular case of a donor as it concentrates on technical aid and its aid is motivated by a particular set of ideological and pragmatic motives Covering the period since the 1950s till today the book analyses particular Israeli resources relevant for African development and the system and contents of Israeli development aid with a particular focus on a new phenomenon of the engagement of businesses and NGOs Zielińska explores the geopolitical context of Israeli aid for Sub Saharan countries and the recipients perception of Israeli aid asking if and how these attitudes influence the recipients behaviour towards Israel within their bilateral relations as well as on multilateral forums Contributing to the knowledge of development diplomacy as a form of expression of soft power and as a tool of foreign policy it will be of interest to international relations students and faculty as well as to other people professionally dealing with Israeli foreign policies [Africa's Health Challenges](#) Dr Hany Besada, Professor Andrew F Cooper, Professor Franklyn Lisk, Professor John J. Kirton, 2013-12-28 This volume addresses the ideational and policy oriented challenges of Africa's health governance due to voluntary and involuntary cross border migration of people and diseases in a growing mobile Africa The collected set of specialized contributions in this volume examines how national and regional policy innovation can address the competing conception of sovereignty in dealing with Africa's emerging healthcare problems in a fast paced interconnect world **Africa's Health Challenges**, 2013 *Global Studies* F. Jeffress Ramsey, 1997 [Journal of the South African Institute of Mining and Metallurgy](#) South African Institute of Mining and Metallurgy, 2000 **Occupational Cancer in Developing Countries** Neil Pearce, 1994 Cancers due to exposures in the workplace in developing countries have received little attention because of the overriding problems in those regions of communicable diseases poverty malnutrition vulnerability to natural disasters and war This book shows however that the global process of industrialization is resulting in increased exposures to occupational carcinogens in developing countries owing to unsafe technology bad working conditions

ineffective legislation on occupational safety and health and inadequate supervision These factors are exacerbated by the fact that a workforce with generally poor health and nutritional status and which includes many women and children is more vulnerable to many diseases including cancer The transfer of hazardous industries and wastes from developed to developing countries is of particular concern This publication brings together all of the available published data on occupational cancer in developing countries and presents the results of a survey carried out at IARC on common occupational exposures and measures that have been taken to control them The overview indicates where information is lacking about the health effects of agents used in developing countries many of which are banned or restricted elsewhere **Africa** Jeff Ramsay,1993
