## **Mpumalanga Preliminary Question Papers:**

**Mpumalanga** Peter Delius (Historian), Peter Nicholas St. Martin Delius, 2007 Mpumalanga is known for its spectacular landscapes and its teeming game reserves. It also has an extraordinarily rich and vivid history which has not been previously recognized. The South African province's valued heritage and its contribution to tourism, education and economic development remain undeveloped. This ground-breaking study ensures that this province's compelling past lives on in the present. Written by some of South Africa's foremost researchers and richly illustrated with historical and contemporary photographs, the book tells a story that begins with the geological records of the first emergence of life on earth three to five billion years ago and concludes with the dawn of an inclusive democracy in South Africa. Areas covered include geology, archaeology, rock art, traditions of early settlements, frontier conflicts, the South African War, conservation, economic development, the contemporary political struggles in the 20th century and the significance of all of this in the light of contemporary debates over heritage. **Annual Report Mpumalanga** (South Africa). **Rethinking Learner Support in Distance Education** Roger Mills, Alan Tait, 2004-08-02 Distance learning is becoming an increasingly popular way of studying and most universities now provide courses using these methods. Today's students though are demanding high quality, consumer-focused and flexible courses as well as learning resources and active learner support. This means that providers of distance education need to reconsider key issues about their learner support systems ensuring that this is delivered appropriately and effectively. Considering the changing needs and demands of distance education students, this book draws together contributions from the UK, USA, Hong Kong, Australia, Japan, South Africa and Botswana to offer an international perspective on the challenges and opportunities of Information and Communication Technologies, ICT quality assurance, commercialisation and the learner as consumer, the impact on learners of cultural differences on internationalised curricula, the implications for learner support of a wider range of learners. This book should be read by all those involved in developing and delivering distance education courses. *The Economics of Water Management in Southern Africa* Glenn-Marie Lange, Rashid M. Hassan, Jaap Arntzen, Jackie Crawford, Eric Mungatana, 2007-01-01 This book presents a valuable new tool for water management: water resource accounting, which significantly advances the economic analysis of water. Water resource accounts integrate detailed information about water supply and use with national income accounts to show the economic use of water, costs and tariffs paid and the economic value of water for different economic uses. Based on the UN's handbook for environmental accounting, this book describes the implementation and policy application of water accounts in three African countries: Botswana, Namibia and South Africa, and discusses how they have been used by water managers. The book compares water use across the three countries, explaining the differences in water resources and water policy. In addition to the comprehensive outline of physical and monetary water accounts for each country, the authors provide an extensive discussion of water valuation as well as addressing a number of

issues of regional importance including water accounting for an international river basin and the impact of trade on each country's water use. By demonstrating the usefulness of water resource accounts, this book makes a major contribution to the literature on water economics and management, sustainable development and to the development of environmental accounting in general. The Economics of Water Management in Southern Africa will appeal to a wide readership including environmental and development economists, NGOs concerned with sustainable development, environmental advocacy groups, professionals, economists and environmentalists working in Africa on water and sustainable development issues, water professionals, national accounts experts and statisticians.

**Democratising Local Government** ,2002

Local government is at the forefront of development. In South Africa, the ambitious policy objectives of post-apartheid reconstruction and development hinge on the successful creation of a democratic tier of government close to the people. An entirely new system of developmental local government has thus been introduced. As is the case in many developing countries, the responsibilities of municipalities in South Africa have been extended dramatically, often without adequate resources. Managing municipalities for development therefore requires political will and strategic intervention. The book provides a comprehensive introduction to developmental local government. It includes the design of the new local government system and the issues posed by decentralisation, an overview of specific challenges of urban and rural municipalities, a discussion of special issues facing local government including poverty, gender and environment, new tools for local government including budgeting, indicators, municipal partnerships and capacity building.
