Supporting Early Mathematical Development Caroline McGrath, 2025-10-14 Supporting Early Mathematical Development is an essential text combining theory and practice to enable successful mathematical education for children from birth to 12 years. This text considers how students, academics, parents and professionals can develop their mathematical thinking practice whilst acknowledging there will always be a road yet to travel; we will always be practising the craft of teaching mathematics. Charting the delivery of mathematical development in playgroups, children's centres, nurseries and primary schools, the book promotes an effective pedagogy for mathematics. This new edition provides a conceptualisation of mathematics and places a fresh emphasis on mathematical literacy to empower children. New chapters include the following: Mediators of Mathematical Thinking, Understanding Pattern, Pre-Algebraic and Algebraic Thinking, Naming, Renaming and Processing Numbers, Statistics, Statistical Diagrams and Probability Measure, Geometry. Throughout the book, Caroline McGrath navigates the complexity of teaching and learning mathematics through careful thought and consideration of mediators of mathematical thinking. This supportive book is designed for educators who want to know how to reconstruct mathematical ideas with children and respond in the moment. Returning to the root of understanding using the adaptive pedagogical style recommended in this text, you can create satisfying mathematical experiences for children. [Celebrating Diversity in Becoming an Educational Researcher](#) Debra McGregor, Sarah Frodsham, Sibel Erduran, 2024-11-13 This book offers a collection of 15 reflective biographical accounts of teachers, scientists, a childhood author, a philosopher, a dancer and other academics' journeys to becoming educational researchers. The personal and professional stories highlight for any would-be doctoral student, researcher or educationalist the challenges and problem resolutions to becoming a researcher. The reflective aspects of the narrated stories also include what I wish I knew before I embarked upon the researcher journey. These wise words, drawing on lived experiences, are useful for educational researchers, educational policymakers, drawing on research and also those responsible for designing doctoral programmes. The penultimate chapter also introduces the passionate voices of the authors that convey the true reality of learning as they develop their identities, appropriate new forms of knowledge, knowing and understandings. In addition to this, the use of metaphors brings alive each author's experiences to demonstrate how this journey is profoundly transformational for everyone. *The Linguistic Challenge of the Transition to Secondary School* Alice Deignan, Duygu Candarli, Florence Oxley, 2022-12-30 This book provides a unique analysis and description of the linguistic challenges faced by school students as they move from primary to secondary school, a major transition which some students struggle with emotionally and academically. The study draws on a bespoke corpus of 2.5 million words of written materials and transcribed classroom recordings provided by the project's partner schools. It combines quantitative and qualitative approaches to the corpus data to explore linguistic variation across school levels, registers and subjects, describes the procedures of corpus compilation and analysis of written and spoken academic language.

showing how modern corpus tools can be applied to this far reaching social and educational issue uncovers differences and similarities between the academic language that school children are exposed to at primary and secondary school contrasting this against the backdrop of the non academic language that they encounter outside school This book is important reading for advanced students and researchers in corpus linguistics applied linguistics and teacher education It carries implications for policymakers and schools looking to support students at this critical point in their schooling The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
