Disruption in Financial Reporting Krish Bhaskar,John Flower,2021-01-21 Since the global financial crisis of 2007 8 new laws and regulations have been introduced with the aim of improving the transparency in financial reporting Despite the dramatically increased flow of information to shareholders and the public this information flow has not always been meaningful or useful Often it seems that it is not possible to see the wood for the trees Financial scandals continue as Wirecard NMC Health Patisserie Valerie going back to Carillion and many more demonstrate Financial and corporate reporting have never been so fraught with difficulties as companies fail to give guidance about the future in an increasingly uncertain world aided and abetted by the COVID 19 pandemic This concise book argues that the changes have simply masked an increase in the use of corporate PR impression management bullet points glossy images and other simulacra which allow poor performance to be masked by misleading information presented in glib boilerplate texts images and tables The tone of the narrative sections in annual reports is often misleading Drawing on extensive research and interviews with insiders and experts this book charts what has gone wrong with financial reporting and offers a range of solutions to improve information to both investors and the public This provides a framework for a new era of forward looking corporate reporting and guidance based on often conflicting multiple corporate goals The book also examines and contrasts the latest thinking by the regulatory authorities Providing a compelling exploration of the industry's failings and present difficulties and the impact of future disruption this timely thought provoking book will be of great interest to students researchers and professionals as well as policy makers in accounting financial reporting corporate reporting financial statement analysis and governance

Retail Therapy Mark Pilkington,2019-01-10 Almost weekly the news is full of stories about disappearing retail chains From House of Fraser and BHS to Toys R Us and Sears recognised names are vanishing overnight as such large organizations disappear so the malls shopping centres high streets and main streets become emptier and less appealing to visit The retail sector is hugely important in terms of job numbers in the US it

employs around 30 million people directly and indirectly in the UK around 10 million As such anything that jeopardises the retail sector will have a deep and lasting impact on millions of lives as well as on public policy While many blame the Amazon effect this is an oversimplification Deeper forces are at work that are changing people s relationships with brands the balance of power between producers and consumers and the whole nature of the supply chain that has existed since the industrial revolution Retail Therapy offers a comprehensive analysis of these forces and their impact on the world of retailing More importantly it presents a cogent analysis of the longer term trends that are shaping retailing and outlines a clear road map for sustainable success in the future
