processes Hence there is a reciprocal relationship between language and social psychology and it is this reciprocal relationship that defines the essence of this handbook The handbook is divided into six sections The first two sections focus on the social underpinnings of language that is the social coordination required to use language as well as the manner in which language and broad social dimensions such as culture mutually constitute one another The next two sections consider the implications of language for a host of traditional social psychological topics including both intraindividual e g attribution and interindividual e g intergroup relations processes The fifth section examines the role of language in the creation of meaning and the final section includes chapters documenting the importance of the language social psychology interface for a number of applied areas
