Local History and War Memories in Hokkaido Philip A. Seaton, 2015-07-24 Hokkaido the northernmost island of Japan barely features in most histories of the Second World War However the combination of distinctive war experiences a vibrant set of local historian groups and powerful media organizations disseminating local war history has generated an identifiable set of local collective memories Hokkaido's status as an early colonial acquisition also makes the island an important vantage point from which to reassess the course and nature of the Japanese Empire This book argues that Hokkaido's experiences of war and its militarized post war constitutes a local case study with a much greater national and international significance on both theoretical and empirical grounds than first impressions might suggest Using

Japanese language sources presented for the first time in English and a number of detailed local history case studies it offers a fascinating and hitherto little known perspective on the Second World War It also combines a comprehensive theory of how war memories operate at the local level within a broad historical context that explains Hokkaido's pivotal role within Japanese imperial history Demonstrating that understanding local history and memories is essential for a nuanced understanding of national history and memories the book will be highly valuable to students and scholars of Japanese history Second World War history and Asian history *Asian Cultural Flows* Nobuko Kawashima, Hye-Kyung Lee, 2018-10-10 This book investigates economic political and cultural conditions that have led to transnational flows of culture in Asia Coverage also looks at the consequences of an increasingly interconnected Asian regional culture as well as policy makers and cultural industries response to it The book features essays written by researchers from different countries in Asia and beyond with diverse disciplinary backgrounds The volume also contains engaging examples and cases with comparative perspectives The contributors provide readers with grounded analysis in the organizational and economic logics of Asian creative industries national cultural policies that promote or hinder cultural flows and the media convergence and online consumers surging demand for Asianized cultural products Such insights are of crucial importance for a better understanding of the dynamics of transnational cultural flows in contemporary Asia In addition the essays aim to de-westernize the study of cultural and creative industries which draws predominantly on cases in the United States and Europe The contributors focus instead on regional dynamics of the development of these industries The popularity of J Pop and K Pop in East and Southeast Asia and beyond is now well known but less is known about how this happened This volume offers readers theoretical tools that will help them to make better sense of those exciting phenomena and other rising cultural flows within Asia and their relevance to the global cultural economy *Defenders of Japan* Garren Mulloy, 2021-12-01 Japan's navy is three times the size of France's and Britain's combined yet most people think it a defenceless nation This book unravels that paradox **Naval War College Review**, 2017
