Dumais, 2012-12-03T00:00:00-05:00 La médiation et la mobilisation de l'objet technique favorisent l'apparition de nouvelles valeurs de nouveaux modèles de références et d'actions transformant par là le rapport soi aux autres et au monde On reconnaît généralement que l'objet technique est en mesure d'accroître ou de diminuer notre efficacité et notre productivité au travail de même que notre puissance d'agir dans les activités libres et créatrices liées au désir d'expression et de production de soi Mais même avec l'aide de l'objet technique le sujet n'a pas la pleine maîtrise de son destin La présence d'autrui lui est essentielle pour exister pleinement et librement Sans douter que l'objet technique puisse être considéré comme un moyen mis à la disposition des individus ou mis en œuvre par eux pour exister on ne saurait toutefois réduire son apport à sa seule dimension instrumentale car la laboration de soi suppose la connaissance des forces de détermination en présence en commençant par celles de la technique et des limites de ce que peut l'individu dans le contexte d'une société capitaliste basée sur le profit la concurrence l'efficacité et le rendement

The New Production of Users Sampsa Hyysalo, Torben Elgaard Jensen, Nelly Oudshoorn, 2016-04-20 Behind the steady stream of new products technologies systems and services in our modern societies there is prolonged and complicated battle around the role of users How should designers get to know the users interests and needs Who should speak for the users How may designers collaborate with users and in what ways may users take innovation into their own hands The New Production of Users offers a rare overview of these issues It traces the history of designer user relations from the era of mass production to the present days Its focus lies in elaborating the currently emerging strategies and approaches to user involvement in business and citizen contexts It analyses the challenges in the practical collaborations between designers and users and it investigates a number of cases where groups of users collectively took charge of innovation In addition to a number of new case studies the book provides a thorough account of theories of user involvement

as well as and offers further developments to these theories As a part of this the book relates to the wide spectrum of fields currently associated with user involvement such as user centered design participatory design user innovation open source software cocreation and peer production Exploring the nexus between users and designers between efforts to democratize innovation and to mobilize users for commercial purposes this multi disciplinary book will be of great interest to academics policy makers and practitioners in fields such as Innovation Studies Innovation Policy Science and Technology Studies Cultural Studies Consumption studies Marketing e commerce Media Studies as well as Design research
