The Man Who Knew Sebastian Mallaby, 2017-12-05 Exceptional Deeply researched and elegantly written As a description of the politics and pressures under which modern independent central banking has to operate the book is incomparable Financial Times The definitive biography of the most important economic statesman of our time from the bestselling author of The Power Law and More Money Than God Sebastian Mallaby s magisterial biography of Alan Greenspan the product of over five years of research based on untrammelled access to his subject and his closest professional and personal intimates brings into vivid focus the mysterious point where the government and the economy meet To understand Greenspan s story is to see the economic and political landscape of our time and the presidency from Reagan to George W Bush in a whole new light As the most influential economic statesman of his age Greenspan spent a lifetime grappling with a momentous shift the transformation of finance from the fixed and regulated system of the post war era to the free for all of the past quarter century The story of Greenspan is also the story of the making of modern finance for good and for ill Greenspan s life is a quintessential American success story raised by a single mother in the Jewish migr community of Washington Heights he was a math prodigy who found a niche as a stats crunching consultant A master at explaining the economic weather to captains of industry he translated that skill into advising Richard Nixon in his 1968 campaign This led to a perch on the White House Council of Economic Advisers and then to a dazzling array of business and government roles from which the path to the Fed was relatively clear A fire breathing libertarian and disciple of Ayn Rand in his youth who once called the Fed s creation a historic mistake Mallaby shows how Greenspan reinvented himself as a pragmatist once in power In his analysis and in his core mission of keeping inflation in check he was a maestro indeed and hailed as such At his retirement in 2006 he was lauded as the age s necessary man the veritable God in the machine the global economy s avatar

His memoirs sold for record sums to publishers around the world But then came 2008 Mallaby's story lands with both feet on the great crash which did so much to damage Alan Greenspan's reputation Mallaby argues that the conventional wisdom is off base Greenspan wasn't a naive ideologue who believed greater regulation was unnecessary He had pressed for greater regulation of some key areas of finance over the years and had gotten nowhere To argue that he didn't know the risks in irrational markets is to miss the point He knew more than almost anyone the question is why he didn't act and whether anyone else could or would have A close reading of Greenspan's life provides fascinating answers to these questions answers whose lessons we would do well to heed Because perhaps Mallaby's greatest lesson is that economic statesmanship like political statesmanship is the art of the possible *The Man Who Knew* is a searching reckoning with what exactly comprised the art and the possible in the career of Alan Greenspan

Failed Promises David M. Konisky, 2015-04-10

A systematic evaluation of the implementation of the federal government's environmental justice policies. In the 1970s and 1980s the U.S. Congress passed a series of laws that were milestones in environmental protection including the Clean Air Act and the Clean Water Act. But by the 1990s it was clear that environmental benefits were not evenly distributed and that poor and minority communities bore disproportionate environmental burdens. The Clinton administration put these concerns on the environmental policy agenda most notably with a 1994 executive order that called on federal agencies to consider environmental justice issues whenever appropriate. This volume offers the first systematic empirically based evaluation of the effectiveness of the federal government's environmental justice policies. The contributors consider three overlapping aspects of environmental justice: distributive justice or the equitable distribution of environmental burdens and benefits; procedural justice or the fairness of the decision making process itself; and corrective justice or the fairness of punishment and compensation. Focusing on the central role of the Environmental Protection Agency, they discuss such topics as facility permitting, rulemaking, participatory processes, bias in enforcement, and the role of the courts in redressing environmental injustices. Taken together, the contributions suggest that despite recent environmental justice initiatives from the Obama administration, the federal government has largely failed to deliver on its promises of environmental justice.

Facing Down the Soviet Union, Kristan Stoddart, 2014-10-16. Facing Down the Soviet Union reveals for the first time the historic deliberations regarding the Chevaline upgrade to Britain's Polaris force, the decisions to procure the Trident C4 and then D5 system from the Americans in 1980 and 1982. It also details the decision to base Ground Launched Cruise Missiles in the UK in 1983.

Handbook on Hybrid Organisations, David Billis, Colin Rochester, 2020-02-28. Hybrid Organisations that integrate competing organisational principles have become a preferred means of tackling the complexity of today's societal problems. One familiar set of examples are organisations that combine significant features from market, public, and third sector organisations. Many different groundbreaking approaches to hybridity are contained in this Handbook, which brings together a collection of empirical studies from an international body of scholars. The chapters analyse and theorise the position of hybrid organisations and have important implications for theory, practice, and policy in a context of proliferating hybrid forms of organisation.
