Memorandum For Geography 2014:

The Drone Memos Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In *The Drone Memos* civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of *The Nation*

The Suicidal State in Somalia Mohamed Haji Ingiriis, 2016-04-01 This book is a critical reposition of the study of military regimes in Africa Documenting and delving deep into the reign and rule of General Mohamed Siad Barre regime in Somalia from 1969 up to 1991 the book puts emphasis on African agencies ostensibly shaped by external beneficiaries and patrons over what went wrong with Africa after the much awaited post colonial period It does so by critically engaging with the wider theoretical and conceptual frameworks in African Studies which more often than not tend to attribute the post colonial African State raptures to colonialism The main thesis of the book is that colonialism left Africa on its own space wherein African leaders could have made a difference By putting discrete perspectives into historical context the book

circumnavigates through comparative and comprehensive holistic approach to the Siad Barre regime to reveal how colonialism did not produce less than what criminalisation of the State resulted in Somalia This empirical analysis is crucial to understanding the contemporary conundrum facing the Somali world today The argument is that the contemporary conflicts are not only attributable to but also because of the past plunders of the post colonial leaders trained by the departed colonial authorities Employing nuanced analytic concepts and categories the aim of the book is to refine the past to recapture the present and envision the future Framing new ways of analyzing military regimes in Africa begins with re assessment of how the Siad Barre regime was previously approached Marshalling extensive and extraordinary amount of sources the book unveils the intricacies and contradictions of the dictatorship and its impact on the Somali psyche The book locates the evolution of the regime within the wider context of the Cold War political contestation between the East and the West Unparalleled in depth and analysis this book is the first full length scholarly study of the Siad Barre regime systematically explaining the politics and process of the dictatorial rule The historicity of exploring Somali State trajectory entails employing a Braudelian *longue durée* approach Thus three interrelated sets of contexts questions inform the study how Siad Barre himself came into power how he ruled and maintained his authoritarian reign over the Somalis and who had assisted him from inside and outside the Somali world

Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke Lloyd, 2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this Content INTRODUCTION by Arma an Teke Lloyd PART A Ideology and Governance of Migration CHAPTER 1 Coming to Terms with Liberal Democracy by the Populist Radical Right Parties of Western Europe Evidence from European Parliament Speeches over Minorities and

Assembling Bus Rapid Transit in the Global South Malve Jacobsen, 2020-12-13 This book explores the mobile ethnography of Dar es Salaam where consultants and politicians have planned and implemented a bus rapid transit BRT system for two decades It analyses the dual processes of assembling BRT in the Tanzanian metropolis and establishing BRT as a policy model of and for the Global South The book elucidates how policy models are constructed and circulated around the globe and depicts the processes by which they are translated between and materialise within specific contexts It presents the case of BRT to demonstrate how technocrats shape these processes through persuasive work aimed at disseminating and stabilising this transport model and how local actors influence its adaptation in Dar es Salaam The book adopts a double mobility approach to show how this ethnography

follows travelling consultants circulating policies and moving buses to explore the fluidity of the BRT model Linking key debates in policy mobility studies and Science and Technology Studies enriched with postcolonial perspectives and geographies of transport and infrastructure it offers new insights into the technopolitics of planning and implementing infrastructure systems This book will appeal to academics and students of human geography transport studies science and technology studies and African and development studies interested in the technopolitics of transport planning **The State of African Cities, 2014** United Nations Publications, 2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa's economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change **Borderless Worlds for Whom?** Anssi Paasi, Eeva-Kaisa Prokkola, Jarkko Saarinen, Kaj Zimmerbauer, 2018-10-25 The optimism heralded by the end of the Cold War and the idea of an emerging borderless world was soon shadowed by conflicts wars terrorism and new border walls Migrants asylum seekers and refugees have simultaneously become key political figures Border and mobility studies are now two sides of the same coin The chapters of this volume reflect the changing relations between borders bordering practices and mobilities They provide both theoretical insights and contextual knowledge on how borders bordering practices and ethical issues come together in mobilities The chapters scrutinize how bounded territorial and open networked relational spaces manifest in various contexts The first section Borders in a borderless world raises theoretical questions The second Politics of inclusion and exclusion looks at bordering practices in the context of migration The third section Contested mobilities and encounters focuses on tourism which has been an accepted form of mobility but which has recently become an object of critique because of overtourism Section four Borders security politics examines bordering practices and security in the EU and beyond highlighting how the migration border politics nexus has become a national and supra national political challenge The chapters of this interdisciplinary volume contribute both conceptually and empirically to understanding contemporary bordering practices and mobilities It is essential reading for geographers political scientists sociologists and international relations scholars interested in the contemporary meanings of borders and mobilities Neutral Beyond the Cold Pascal Lottaz, Heinz Gärtner, Herbert R. Reginbogin, 2022-06-27 The collapse of the Soviet Union and the wars in

Yugoslavia radically changed the security environment in Europe and Central Asia. Some predictions assumed the emerging unipolarity of the liberal world order would end neutrality policies in East and West but as this volume shows this was not the case. While some traditional Cold War neutrals like Sweden and Finland have been edging closer to security alignment with western institutions there are others like Austria, Switzerland, Ireland and Malta that remained committed to their traditional nonaligned foreign policy approaches. More importantly there are areas of Eurasia that developed new forms of neutrality policies most of them only noticed on the margins of academic discourse. This is the first book to systematically explore this new neutralism of the Post Cold War. In part one the book analyzes contemporary neutrality discourse on several levels like international organizations, UN, ASEAN, diplomacy and academic theory. Part two discusses neutrality related policy developments in Belarus, Moldova, Ukraine, Georgia, Serbia, Turkmenistan, Afghanistan and Mongolia. Together the 15 chapters show how on this vast connected landmass references to neutrality have remained a staple of international politics. *The State of African Cities*, 2014. 9789211325980 A Geography of Jihad Stephanie Zehnle, 2020. This book addresses the Jihad movement that created the largest African state of the 19th century the Sokoto Caliphate existing for 99 years from 1804 until its military defeat by European colonial troops in 1903. The author carves out the entanglements of jihadist ideology and warfare with geographical concepts at Africa's periphery of the Islamic world, geographical knowledge about the boundary between the Land of Islam and the Land of War, the pre colonial construction of the Muslim and the unbeliever and the transfer of ideas between political elites and mobile actors, traders, pilgrims, slaves, soldiers whose reports helped shape new definitions of the African frontier of Islam. Research for this book is based on the study of a very wide range of Arabic and West African Hausa Fulfulde manuscripts. Their policies reveal the persistent reciprocity of jihadist warfare and territorial statehood of Africa and the Middle East. Stephanie Zehnle is Assistant Professor JProf of Extra European History at Kiel University Christian Albrechts Universit t. Her work on African and trans continental history includes research on the history of Islam, human, animal relations and comics in Africa. **Union Catalog of Serials Currently Received in the Libraries of the University of Wisconsin--Madison**

Joint Research Centre, 2016. The Atlas describes soil as habitat for the diversity of organisms that live under our feet. At the same time it draws attention to the threats to soil biodiversity such as invasive species, pollution, intensive land use practices or climate change. The Atlas provides current solutions for a sustainable management of soils. It was coordinated by the JRC and the Global Soil Biodiversity Initiative www.globalsoilbiodiversity.org with more than 70 contributing organisations and several hundred individual contributions. It illustrates the diversity of soil organisms, explains their geographical and temporal

distribution the ecosystem functions and services provided by soil biota Most importantly it draws attention to the myriad of threats to soil biodiversity These include inappropriate land management practices e g deforestation land take for infrastructure development agricultural systems over grazing forest fires and poor water management both irrigation and drainage Other practices such as land conversion from grassland or forest to cropped land result in rapid loss of soil carbon which indirectly enhances global warming The Atlas shows that mismanaging soils could exacerbate the effects of climate change jeopardise agricultural production compromise the quality of ground water and worsen pollution It also proposes solutions to safeguard soil biodiversity through the development of policies that directly or indirectly target soil health leading to a more sustainable use *Parliamentary Debates (Hansard)*.
