Mental Health Nursing Journal:

Key Debates in Psychiatric/Mental Health Nursing John R Cutcliffe, Martin Ward, 2006-10-12 This book is unique because no other psychiatric mental health nursing text has ever brought together opposing or contrasting views of the same issue and subsequently invited two separate chapters to be written in order to articulate the different perspectives in the debate. Further, no book has then followed up such a wide and thorough discussion by inviting a third party to offer commentary. The purpose of this book is to present a range of key issues that psychiatric mental health nurses face. They are practice, policy, research, and education related issues. The purpose then is to present the most complete, balanced arguments possible in order to inform, educate, and stimulate psychiatric mental health nurses. Furthermore, the purpose of the book is to make psychiatric mental health nurses more aware of the often uncertain nature of much of psychiatric mental health nursing practice and knowledge. Psychiatric mental health nursing is not characterised by black and white, easily delineated issues and is perhaps characterised by various shades of grey. Indeed, it is often stated as axiomatic that psychiatric mental health nurses can be described as a broad church. Consequently, the purpose of this book is to help psychiatric mental health nurses appreciate this broad church, be able to understand the various shades of grey, be able to understand that often there are differing views, inconclusive arguments, and contentious debates, and for this to influence their clinical practice. As the international range of contributors illustrates, these debates to a greater or lesser extent are issues and debates that psychiatric mental health nurses face the world over; these are matters of real international importance and significance. These issues have been touched upon and to a limited extent debated at psychiatric mental health nursing conferences and to an even lesser extent within some psychiatric mental health nursing journals. Thus, they are real issues that many nurses are facing. Talking about and trying to resolve key debates are presented with arguments from opposing viewpoints followed by a third party commentary to give readers the necessary information to form their own view, written by a range of international authors from different countries across three continents. One of the first psychiatric mental health nursing books to explore the pedagogical value of debate.

Psychiatric-Mental Health Nursing Jeffrey S. Jones, Vickie L. Rogers, Joyce J. Fitzpatrick, 2012-03-16 This psychiatric mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders and addresses mental health care settings across the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses.

What would you do questions stimulate discussions and sample and practice care plans for chronic mental illness facilitate integration of concepts into practice Evidence based practice summaries from psychiatric nursing and related research literature are included and NANDA guidelines are integrated throughout A new chapter with DSM V updates is also available This affordably priced text additionally comes with supplementary materials for both teachers and students including handy review guides summaries drug monographs and hyperlinks to films and video illustrating content A test bank and PowerPoint slides are also available for instructors Key Features Integrates and applies the Peplau Travelbee interpersonal relations theories to the four step Assessment Planning Diagnosing Implementation and Evaluation APIE nursing process Addresses critical thinking clinical decision making therapeutic interventions case management roles and mental health care settings across the lifespan Features NCLEX preparation questions vivid clinical scenarios and evidence based practice summaries Addresses the most current ISPN and APNA competencies A new chapter with DSM V updates is available Both student and teacher digital aids including review guides summaries hyperlinks to films and video and drug monographs are available A test bank and PowerPoint slides are also available for instructors eBook Features available in all eBook formats Bidirectional link between Key Terms and their glossary definitions Learning Outcomes at start of chapters link to respective sections in book Hyperlinks to supplementary films and videos Care plans DSM V update This book is also available as part of a discounted set To view the Psychiatric Mental Health Nursing Special A Student Pack click the link above
