Mitel Ops Manager User Guide:

Implementation of an Enterprise Resource Planning System with Focus on End-User Training Elke Simon, 1999-11-24

Inhaltsangabe Abstract The implementation of an Enterprise Resource Planning ERP system refers to Information Systems Business Processes and People Basically it is a changing procedure in organizations that strive for company wide high performance Business Process Transformation is about changing a company's focus from products to customers Information Systems are replaced by a homogenous system environment which integrates all information into a common system The behaviour and skills of the company wide personnel are adapted to perform in the new world The big challenge of the implementation is to have the properly trained people for a high performance organization Unfortunately most companies do not recognize that need They underestimate the impact that the human factor has on an ERP approach they consider the implementation as a software installation with influence to the business But the implementation is much more complex This thesis is dedicated to all those persons who intend to implement an Enterprise Resource Planning system and who want to understand the theory of Business Process Transformation and how it is linked to Enterprise Resource Planning To emphasize the importance of the human factors within the implementation chapter 4 elaborates on End User Training as a significant part of an implementation for a company dedicated to becoming a high performance organization This paper also includes a case study of an ERP implementation at Mitel Corporation The case study presents information about the Company its ERP implementation and its approach to End User Training **Inhaltsverzeichnis Table of Contents**
