La Vie Vient Du Dehors:

Annie Ernaux Siobhán McIlvanney, 2001-01-01 This text provides an analysis of Annie Ernaux's individual texts. It engages in a series of provocative close readings of her works to highlight the contradictions and nuances in her writing, demonstrating the intellectual intricacies of her work.

Mutations of Hellenism in Late Antiquity Polymnia Athanassiadi, 2017-07-05 The 21 studies in this volume, which deal with issues of social and intellectual history, religion, and historical methodology, explore the ways whereby over the course of a few hundred years, roughly between the second and the fifth centuries A.D., an anthropocentric culture mutated into a theocentric one. Rather than underlining the differences between a revamped paganism and the emergent Christian traditions, the essays in the volume focus on the processes of osmosis, interaction, and acculturation, which shaped the change in priorities among the newly created textual communities that were spreading across the entire breadth of the late antique oecumene. The main issues considered in this connection include the phenomena of textuality and holy scripture, canonicity and exclusion, truth and error, prophecy and tradition, authority and challenge, faith and salvation, holy places and holy men in the context of the construction of new orthodox readings of the Greek philosophical heritage. Moreover, the volume suggests that intolerant attitudes, which form a characteristic trait of monotheisms, were not an exclusive preserve of Christianity as the Enlightenment tradition would insist, but were progressively espoused by pagan philosophers and divine men as part of the theory and practice of Hellenism's theological koine. Efforts to establish the monopoly of a revealed truth against any rival claims were transversal to the textual communities which emerged in late antiquity and remodelled the intellectual and spiritual landscape of the Greater Mediterranean.

Linguistica Otto Jespersen, 2015-07-24 This volume, first published in 1933, brings together a collection of Otto Jespersen's papers in English, German, and French, which he himself felt should be presented to an international public. This title gives a picture of Jespersen's development and endeavours as a linguist and covers a wide time period of his career. This book will be of interest to students of linguistics and foreign language study.

History of Linguistics 1996 David Cram, Andrew R. Linn, Elke Nowak, 1999-12-15 This volume contains papers on linguistic historiography ranging chronologically from ancient Greece to the present and covering philosophical, social, and political aspects of language as well as the study of grammar in the narrow sense. The work opens with the report on a round table discussion of problems in translating ancient grammatical texts. The remainder of the volume is arranged in chronological sections with contributions as follows: II Classical and Medieval; III Seventeenth Century; IV Eighteenth Century; V Nineteenth Century; VI Twentieth Century.
