**Mémoires de mathématique et de physique** ,1755      **Strands of Utopia** Michael G Kelly,2017-12-02 The poetic is an abiding yet elusive qualification within the discursive system of twentieth century French literature No longer amenable to formal assignment its recurrences delimit a shifting multi layered practice of artistic and intellectual self invention This study attempts to outline certain durable properties of that practice by confronting it with the complex theoretical and spatial metaphor of utopia Drawing in particular upon the oeuvres of Victor Segalen 1878 1919 Rene Daumal 1908 44 and Yves Bonnefoy b 1923 it traces poetic work work done in support of poetic difference along the social physical and textual axes of what is argued to be a sustained and radically inclusive utopian practice within the literary field The complex utopian quality of poetic work is linked to the cultural persistence of the poetic as a simple attribute within literary practice In uncovering this link the study encourages revised understandings of both the poetic and the utopian in the modern French literary context      Report of the ...
