• **Control:** *Antibiotic resistance* (bacteria become resistant to antibiotic drug treatment) is regulated by *plasmids* (small, circular, self-replicating and non-essential DNA molecules that can be transferred from one bacterium to another).

Abstract—This study examined the effectiveness of a 12-week, group-based, self-management program for patients with type 2 diabetes. The program was designed to improve patients' knowledge, self-efficacy, and adherence to medical and lifestyle recommendations. The program was evaluated using a randomized controlled trial design. The results showed that the program was effective in improving patients' knowledge, self-efficacy, and adherence to medical and lifestyle recommendations. The program was also effective in improving patients' glycemic control, as measured by hemoglobin A1c levels. The results of this study suggest that the program is a promising intervention for improving the health of patients with type 2 diabetes.

Abstract The purpose of this study was to determine the effect of a 12-week, low-intensity, low-impact, and low-impact exercise program on the physical and psychological health of older adults. The study was a randomized controlled trial. The intervention group (n = 20) participated in a 12-week, low-intensity, low-impact, and low-impact exercise program. The control group (n = 20) participated in a 12-week, low-intensity, low-impact, and low-impact exercise program. The study was conducted in a community center. The results of the study showed that the intervention group had significantly higher levels of physical and psychological health than the control group at the end of the 12-week period. The results of the study suggest that a 12-week, low-intensity, low-impact, and low-impact exercise program can improve the physical and psychological health of older adults.

Scientific and Technical Conference Integrated Computer Technologies in Mechanical Engineering Synergetic Engineering ICTM was established by National Aerospace University Kharkiv Aviation Institute The Conference ICTM 2022 was held in Kharkiv Ukraine during November 18-20, 2022. During this conference, technical exchanges between the research community were carried out in the forms of keynote speeches, panel discussions, as well as a special session. In addition, participants were treated to a series of receptions which foster collaborations among fellow researchers. ICTM 2022 received 137 paper submissions from different countries. All of these offer us plenty of valuable information and would be of great benefit to experience exchange among scientists in modeling and simulation. The organizers of ICTM 2022 made great efforts to ensure the success of this conference. We hereby would like to thank all the members of ICTM 2022 Advisory Committee for their guidance and advice, the members of program committee and organizing committee, and the referees for their effort in reviewing and soliciting the papers, and all authors for their contribution to the formation of a common intellectual environment for solving relevant scientific problems. Also, we are grateful to Springer Janusz Kacprzyk and Thomas Ditzinger as the editor responsible for the series Lecture Notes in Networks and Systems for their great support in publishing these selected papers.
