Automorphisms of Riemann Surfaces, Subgroups of Mapping Class Groups and Related Topics Aaron Wootton, S. Allen Broughton, Jennifer Paulhus, 2022-02-03

Automorphism groups of Riemann surfaces have been widely studied for almost 150 years This area has persisted in part because it has close ties to many other topics of interest such as number theory graph theory mapping class groups and geometric and computational group theory In recent years there has been a major revival in this area due in part to great advances in computer algebra systems and progress in finite group theory This volume provides a concise but thorough introduction for newcomers to the area while at the same time highlighting new developments for established researchers The volume starts with two expository articles The first of these articles gives a historical perspective of the field with an emphasis on highly symmetric surfaces such as Hurwitz surfaces The second expository article focuses on the future of the field outlining some of the more popular topics in recent years and providing 78 open research problems across all topics The remaining articles showcase new developments in the area and have specifically been chosen to cover a variety of topics to illustrate the range of diversity within the field

International Legal Responsibility of International Organizations in the ILC Draft Articles and Beyond Sarah Bayani, 2022 The phenomenon of proliferation of international organizations has urged focus on the responsibility of international organizations under international law as the effect of their activities is witnessed everywhere in our daily life The main purpose of the present book is to examine and review some specific aspects relevant to the question of international legal responsibility of international organizations mainly with a view to assessing the International Law Commission's work on the codification of the international legal rules applicable on international organizations in this area At the same time the intention is to address the major challenge to the codification of general rules for international organizations namely their wide varying nature and their differences from each other Furthermore the

perspective has been enlarged by elaborating on the broader concept of accountability of international organizations
