Nicolas doit héberger un petit camarade anglais pendant quelques jours Terrible Mais lorsque Djodjo pose ses valises chez lui Nicolas n'a qu'une seule envie retrouver ses bons vieux copains Seulement dans la bande rien ne va plus alors que les enfants doivent faire une réaction sur l'amitié tout le monde a décidé de se disputer

Ionisation et dissociation par impact électronique d'ions moléculaires d'intérêt atmosphérique et thermonucléaire Julien Lecointre, 2007 Dans les milieux ionisés existe un grand nombre d'espèces chimiques Beaucoup sont en quantité minoritaire mais jouent pourtant par leur grande réactivité un rôle essentiel dans les processus de transformation chimique Cette étude s'intéresse la structure et la dynamique des ions moléculaires ainsi qu'aux collisions réactives pour des systèmes intervenant dans les atmosphères planétaires et dans le milieu interstellaire comme les réactions mettant en jeu le monoxyde de carbone Des modélisations numériques sont nécessaires la comparaison des expériences de fusion thermonucléaire Enrichies par les résultats expérimentaux concernant les ions d'hydrocarbures tels que le méthane ils fournissent une aide pour l'interprétation des phénomènes observés dans les tokamaks L'identification des réactions physiques l'origine de la présence de particules dans le plasma est une tâche importante afin de comprendre les environnements ionisés Les systèmes examinés Louvain-la-Neuve sont donc choisis pour leur intérêt immédiat en astrophysique ou en physique des plasmas Alors que la connaissance des processus d'ionisation par impact d'électrons d'espèces atomiques ou ioniques simples est bien établie ce n'est pas encore le cas lorsque la cible primaire est un ion moléculaire L'existence d'au moins un degré de liberté supplémentaire rend possible la dissociation de l'ion moléculaire initial en plusieurs fragments une partie de l'énergie potentielle est alors transférée sous forme d'énergie cinétique aux produits En conséquence ceux-ci sont généralement distribués dans de larges gammes angulaire et énergétique L'analyse fine des distributions permet d'étudier les détails de la collision électronique L'expérience a pour thématique majeure la mesure des sections efficaces absolues en fonction de l'énergie des électrons projectiles incidents pour des réactions impliquant des espèces ioniques polyatomiques L'observation des seuils de réaction et de l'énergie cinétique des fragments permet de déterminer la zone de Franck-Condon accessible et les états moléculaires impliqués dans les processus considérés Les travaux réalisés au laboratoire ont démontré que l'appareillage existant est bien approprié ce type d'étude A un niveau plus fondamental l'examen comparatif minutieux des précises mesures des résultats issus d'autres expériences et des prédictions des formalismes semi-empiriques permet d'améliorer la connaissance des phénomènes collisionnels
