Gotz,2001-08-30 Most contemporary accounts of the role of technology in world culture are alarmist and at times condemn many uses of technology without much effort to get beyond the surface of this worldwide phenomenon Technological innovations that might rightly be critiqued are taken as representative of the entire field of technology On the other hand there are those including some scientists for whom technology and its uses pose no questions at all and who seem to delight in predictions of a future totally dominated by technology They prey on the human delight in newness and innovation and on our readiness to be surprised by what may someday come to be G tz takes the position that so called technology problems are really our problems not the fault of technology Technology is an integral part of what we are as human beings a significant aspect of our evolution G tz also advances the thesis that technology may be viewed from the perspective of the human capacity to grow and that when we do so we are in effect spiritualizing technology and rendering it more meaningful to ourselves G tz suggests several models that may be employed to achieve this spiritualization This provocative analysis will be of interest to general readers as well as scholars students and researchers concerned with contemporary social and religious issues **The Child Life Quarterly** ,1908 Connected Thoughts Stephen R. Herr,1997 Since Antioch s reorganization in the early 1920s the event has been heralded as a wonder of academic innovation and generally credited to the work of one man Arthur Morgan This book examines the politics of educational innovation as represented by that reorganization Connected Thoughts draws on a large number of sources to redefine Antioch College s reorganization In doing this the author links the event to the numerous institutions organizations and individuals who helped define the event showing that the reorganization was neither a remarkable educational innovation not the work of one man but rather required the efforts of a number of individuals whose work was in many ways in harmony with both the traditions of the institution and the larger educational community This is an illuminating study of institutional renewal and reorganization **The Philosopher's Autobiography** Shlomit C. Schuster,2003-01-30 Throughout the ages philosophers have examined their own lives in an attempt both to find some meaning and to explain the roots of their philosophical perspectives This volume is an introduction to philosophical autobiography a rich but hitherto ignored literary genre that questions the self its social context and existence in general The author analyzes representative narratives from antiquity to postmodernity focusing in particular on three case studies the autobiographies of St Augustine Rousseau and Sartre Through the study of these exemplary texts

Citizens and Statesmen Mary P. Nichols,1992 Two important criticisms of contemporary liberalism turn to Aristotle s political thought for support that which advocates participatory democracy and that sympathetic to the rule of a virtuous or philosophic elite In this commentary on Aristotle s politics the author explores how Aristotle offers political rule as an alternative to both the rule of aristocratic virtue and an unchecked participatory democracy Writing in lucid prose she offers an interpretation grounded in a close reading of the text and combining a respectful and patient attempt to understand Aristotle in his own terms with a wide sympathetic and argumentative reading in the secondary literature *The British National Bibliography* Arthur James Wells,2003 **Biographical Dictionary of Psychology** Leonard Zusne,1984-10-18
