Life Science 2014 Paper 1 Scope:

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges

Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives **The Life**

Sciences in Early Modern Philosophy Ohad Nachtomy, Justin E. H. Smith, 2013-12-04 The present volume advances a recent historiographical turn towards the intersection of early modern philosophy and the life sciences by bringing together many of its leading scholars to present the contributions of important but often neglected figures such as Ralph Cudworth Nehemiah Grew Francis Glisson Hieronymus Fabricius ab Aquapendente Georg Ernst Stahl Juan Gallego de la Serna Nicholas Hartsoeker Henry More as well as more familiar figures such as Descartes Spinoza Leibniz Malebranche and Kant The contributions to this volume are organized in accordance with the particular problems that living beings and living nature posed for early modern philosophy the problem of life in general whether it constitutes something ontologically distinct at all or whether it can ultimately be exhaustively comprehended in the same manner as the rest the problem of the structure of living beings by which we understand not just bare anatomy but also physiological processes such as irritability motion digestion and so on the problem of generation which might be included alongside digestion and other vital processes were it not for the fact that it presented such an exceptional riddle to philosophers since antiquity namely the riddle of coming into being out of apparent or real non being and finally the problem of natural order **Research Handbook on**
