Bihar and Mithila J. Albert Rorabacher,2016-09-13 The world has become obsessed with the Western notions

of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates *Personalized Deeper Learning* James A.

Crises of Global Climate Change Phoebe Godfrey,Denise Torres,2016-04-14 Sociological literature tends to view the social categories of race class and gender as distinct and has avoided discussing how multiple intersections inform and contribute to experiences of injustice and inequity This limited focus is clearly inadequate Systemic Crises of Global Climate Change is an edited volume of 49 international interdisciplinary contributions addressing global climate change GCC by intentionally engaging with the issues of race gender and class through an intersectional lens The volume challenges and inspires readers

to foster new theoretical and practical linkages and think beyond the traditional and oftentimes reductionist environmental science frame by examining issues within their turbulent political cultural and personal landscapes Varied media and writing styles invite students and educators to reflexively engage different yet complementary approaches to GCC analysis and interpretation mirroring the disparate voices and viewpoints within the field The second volume Emergent Possibilities for Sustainability will take a similar approach but will examine the possibilities for solutions as in the quest for global sustainability This book is a valuable resource for academics researchers and both undergraduate and post graduate students in the areas of Environmental Studies Climate Change Gender Studies and International studies as well as those seeking a more intersectional analysis of GCC

Classical Marxism in an Age of Capitalist Crisis William Briggs, 2019-03-14 Will capitalism survive forever Capitalism has always lived in and with crisis Wars revolutions economic depression and repeated recessions the threat of nuclear annihilation and ecological disaster have all failed to break the dominance of this economic and political system Challenging the predominance of capitalism in a world fraught with inequalities this book returns to classical Marxism to reaffirm its relevance It explores the contradictions within capitalism as well as explains why Marxism has been unable to mount a sustained challenge to capitalism In order to explore concrete alternatives in a period of increasing capitalist globalisation and crisis it goes on to present perspectives by which theory and practice might be reunited to building independent political and organisational structures A search for something better this volume will be an engaging read for scholars and researchers of politics especially political theory and political economy economics and sociology *Engineering and Mining Journal* ,1903 *Subject Catalog of the World War I Collection* New York Public Library. Reference Department, 1961 *Urbanization and Development* ,2016 The analysis of urban development of the past twenty years presented in this maiden edition of the World Cities Report shows with compelling evidence that there are new forms of collaboration and cooperation planning governance finance and learning that can sustain positive change The Report unequivocally demonstrates that the current urbanization model is unsustainable in many respects It conveys a clear message that the pattern of urbanization needs to change in order to better respond to the challenges of our time to address issues such as inequality climate change informality insecurity and the unsustainable forms of urban expansion *The Engineer* ,1884
