

PHOTOSYNTHESIS

= process where plants make organic food using radiant energy from sunlight.

ENERGY ABSORPTION (trapping)

↳ main function of leaf = photosynthesis

→ plant cells containing chlorophyll pigment absorb radiant e^- from sun.

↳ green pigment in plants responsible for light absorption to provide e^- for photosynthesis.

* e^- , H_2O & CO_2 combined to form sugars (glucose) & by-product O_2 released into air.

RAW MATERIALS

CHLOROPHYLL

↳ embedded in membranes of thylakoids in the chloroplasts in plant cells

↳ membrane bound sacs which have chlorophyll molecules attached.

* Iron required to make chlorophyll

* Magnesium required to make & becomes incorporated into chlorophyll molecule

→ Structure of Chloroplast + function

* contain thylakoids

* granum(a) = thylakoids stacked together in piles

→ light-dependant phase of photosynthesis

occurs on thylakoid / grana membrane

→ chloroplast has dif enzymes which catalyse reactions of light-independent stage of photosynthesis

Beyond Uneconomic Growth Joshua Farley, Deepak Malghan, 2016 Daly s contributions to the still emergent field of ecological economics are constant references for our peers throughout the developing world as well as in the North His courageous tilting at the windmills of mainstream economic nonsense inspire us to continue questioning in whose interests do we continue on a perpetual search for unlimited material satisfaction Daly s conception is not only of a world restricted by biophysical limits but also one in which poverty and deprivation are commonplace and where Sisyphean efforts to maintain accelerated economic growth only exacerbate inequitable distribution His vision of sustainable economic welfare shed light on other aspects of our existence which make it worth living Thanks to Farley Rees El Serafy Goodland and other fellow travelers we are bestowed with an excellent collection synthesizing Daly s contributions to our work which will inspire our youth and their children long after we too depart Peter H May President Brazilian Society for Ecological Economics ECOECO Contributed by several eminent thinkers the chapters in this book herald the paradigm shift that is

needed to save the scientific framework of economics In spite of the conceptual inconsistencies GDP continues to be accepted by the nation states as the singular parameter to comprehensively describe the health of their economy What gets easily hidden behind Market Failures is actually the success of cost shifting on the heads of the ignorant and marginalized people as price for economic growth The chapters eloquently establish the need for moving beyond the religious faith on a paradigm that is facing fundamental conceptual challenges but has not addressed them with due seriousness What is a greater contribution of this collection is the identification of the gaps in knowledge of economics that need to be filled up to arrive at some basic articulations of the new paradigm that can throw some light on what is ecologically and socially Sustainable Development Jayanta Bandyopadhyay Past President The Indian Society for Ecological Economics The title Beyond Uneconomic Growth captures both the core of Herman Daly s key message and the linguistic mastery that makes his texts so enjoyable to read The book forms a great tribute to the work of Herman Daly by gathering a distinguished set of contributors covering a wide variety of the topics that Daly has dealt with and pointing in new directions Inge R pke Aalborg University Denmark This engaging book brings together leading ecological economists to collectively present a definitive case for looking beyond economic growth as the sole panacea for the world s ecological predicament Grounded in physics ecology and the science of human behavior contributors show how economic growth itself has become uneconomic and adds to a ravaging of both social and ecological cohesion Guided by a clear moral vision that prioritizes sustainability and justice over profit the authors provide a blueprint for an economy that replaces quantitative growth with qualitative improvement to enhance human welfare while restoring degraded ecosystems They present solutions for many of today s challenges ranging from global climate change and biodiversity loss to natural resource depletion This interdisciplinary work not only relates ecological economics theory to the most urgent predicaments of the contemporary world but also pays tribute to the work of Herman Daly a leading pioneer of modern ecological economics Researchers and faculty studying and teaching ecological economics and environmental studies will find value in this unprecedented book It will also be of interest to practitioners working to solve a variety of global environmental issues
