Magna Grecia Temples Grecs De Sicile:

The Making of the Doric Temple Gabriel Zuchtriegel, 2023-04-20 In this volume Gabriel Zuchtriegel revisits the idea of Doric architecture as the paradigm of architectural and artistic evolutionism Bringing together old and new archaeological data some for the first time he posits that Doric architecture has little to do with a wood to stone evolution Rather he argues it originated in tandem with a disruptive shift in urbanism land use and colonization in Archaic Greece Zuchtriegel presents momentous architectural change as part of a broader transformation that involved religion politics economics and philosophy As Greek elites colonized explored and mapped the Mediterranean they sought a new home for the gods in the changing landscapes of the sixth century BC Greek world Doric architecture provided an answer to this challenge as becomes evident from parallel developments in architecture art land division urban planning athletics warfare and cosmology Building on recent developments in geography gender and postcolonial studies this volume offers a radically new interpretation of architecture and society in Archaic Greece

Cults, Territory, and the Origins of the Greek City-State François de Polignac, 1995-08-15 Combining archaeological and textual evidence the author suggests that most of the 8th Century settlements that would become the city states of classical Greece were defined as much by the boundaries of civilised space as by their urban centres

The Fight for Greek Sicily Melanie Jonasch, 2020-06-30 The island of Sicily was a highly contested area throughout much of its history Among the first to exert strong influence on its political cultural infrastructural and demographic developments were the two major decentralized civilizations of the first millennium BCE the Phoenicians and the Greeks While trade and cultural exchange preceded their permanent presence it was the colonizing movement that brought territorial competition and political power struggles on the island to a new level The history of six centuries of colonization is replete with accounts of conflict and warfare that include cross cultural confrontations as well as interstate hostilities domestic conflicts and government violence This book is not concerned with realities from the battlefield or questions of military strategy and tactics but rather offers a broad collection of archaeological case studies and historical essays that analyze how political competition strategic considerations and violent encounters substantially affected rural and urban environments the island's heterogeneous communities and their social practices These contributions originating from a workshop in 2018 combine expertise from the fields of archaeology ancient history and philology The focus on a specific time period and the limited geographic area of Greek Sicily allows for the thorough investigation and discussion of various forms of organized societal violence and their consequences on the developments in society and landscape
