Guide for Decision Makers Alexander Zhivov, Rüdiger Lohse, 2021-02-10 Many governments worldwide are setting more stringent targets for reductions in energy use in government public buildings. Buildings constructed more than 10 years ago account for a major share of energy used by the building stock. However, the funding and know-how applied knowledge available for owner directed energy retrofit projects has not kept pace with new requirements. With typical retrofit projects, reduction of energy use varies between 10 and 20% while actual executed renovation projects show that energy use reduction can exceed 50% and can cost effectively achieve the Passive House standard or even approach net zero energy.
