Mechanical Reasoning Tools Study Guide:

The cognitive and neural bases of human tool use François Osiurak, Cristina Massen, 2015-02-12 Humans are not unique in using tools But human tool use differs from that known to occur in nonhumans in being very frequent spontaneous and diversified So a fundamental issue is what are the cognitive and neural bases of human tool use This Research Topic of Frontiers provides a venue for leading researchers in the field of tool use to present original research papers integrative reviews or theoretical articles that further our understanding of this topic Articles address a wide range of issues including for instance the nature of the underlying representations e g conceptual sensorimotor the mechanisms supporting the incorporation of tools into body schema the link between imitation and tool use or the evolutionary origins of human tool use Articles are included from experimental psychology neuropsychology neuroimaging neurophysiology developmental psychology ethology comparative psychology and ergonomics The goal of this Research Topic of Frontiers is to provide a state of the art view of the field

Tool Use and Causal Cognition Teresa McCormack, Christoph Hoerl, Stephen Butterfill, 2011-08-25 What cognitive abilities underpin the use of tools and how are tools and their properties represented or understood by tool users Does the study of tool use provide us with a unique or distinctive source of information about the causal cognition of tool users Tool use is a topic of major interest to all those interested in animal cognition because it implies that the animal has knowledge of the relationship between objects and their effects There are countless examples of animals developing tools to achieve some goal chimps sharpening sticks to use as spears bonobos using sticks to fish for termites and New Caledonian crows developing complex tools to extract insects from logs Studies of tool use have been used to examine an exceptionally wide range of aspects of cognition such as planning problem solving and insight naive physics social relationship between action and perception A key debate in recent research on animal cognition concerns the level of cognitive sophistication that is implied by animal tool use and developmental psychologists have been addressing related questions regarding the processes through which children acquire the ability to use tools In neuropsychology patterns of impairments in tool use due to brain damage and studies of neural changes associated with tool use have also led to debates about the different types of cognitive abilities that might underpin tool use and about how tool use may change the way space or the body is represented Tool Use and Causal Cognition provides a new interdisciplinary perspective on these issues with contributions from leading psychologists studying tool use and philosophers providing new analyses of the nature of causal understanding A ground breaking volume which covers several disciplines this volume will be of interest to psychologists including animal researchers and developmental psychologists as well as philosophers and neuroscientists
