**The Significance of Exemplars for the Interpretation of the Letter of James** Robert J. Foster, 2014-09-23 What was the function of the four characters from Jewish history and tradition in the Letter of James Robert J Foster analyses James use of these characters and argues that despite each of them being tested to the extreme they all remained wholly committed to God

**Cassian's Conferences** Christopher J. Kelly, 2016-04-08 This book explores Cassian's use of scripture in the Conferences especially its biblical models to convey his understanding of the desert ideal to the monastic communities of Gaul Cassian intended the scriptures and implicitly the Conferences to be the voices of authority and orthodoxy in the Gallic environment He interprets familiar biblical characters in unfamiliar ways that exemplify his ideal By imitating their actions the monk enters a seamless lineage of authority stretching back to Abraham This book demonstrates how the scriptures functioned as a dynamic force in the lives of Christian monks in the fourth and fifth centuries emphasizes the importance of Cassian in the development of the western monastic tradition and offers an alternative to the sometimes problematic descriptions of patristic exegesis as allegory or typology Cassian has been described as little more than a provider of information about Egyptian monasticism but a careful reading of his work reveals a sophisticated agenda to define and institutionalize orthodox monasticism in the Latin West

**Continuities and Discontinuities in Development** Robert N. Emde, Robert J. Harmon, 2012-12-06 Continuities and Discontinuities in Development was the theme for the Second Biennial DPRG Retreat a three day meeting held at Estes Park Colorado in June 1982 The meeting was sponsored by the Developmental Psychobiology Research Group DPRG of the Department of Psychiatry at the University of Colorado School of Medicine The DPRG is a group of individuals conducting research in many areas of development who meet on a regular basis to present and discuss their work and receive feedback and encouragement In 1974 this group was awarded an endowment fund by the Grant Foundation the aims of which were to facilitate the research of young investigators to encourage new research and to provide seed money for collaborative

ventures Much of the work reported in this volume and in the earlier volume from the First DPRG Retreat is the result of that support In addition to the work of the members of the DPRG a select group of guests was invited to participate in the meeting and contribute to this volume The chapters by William Greenough Jerome Kagan and Michael Rutter result from the participation of these scholars at the retreat We would like to acknowledge the support of a number of individuals who have been instrumental in supporting the DPRG as a whole as well as those who contributed directly to the Second Biennial Retreat and to the volume

*Real World: From Neural Activity to Behavior* Simona Monaco, Gavin Buckingham, Irene Sperandio, J. Douglas

Crawford, 2016-12-07 One remarkable ability of the human brain is to process large amounts of information about our surroundings to allow us to interact effectively with them In everyday life the most common way to interact with objects is by reaching grasping lifting and manipulating them Although these may sound like simple tasks the perceptual properties of the target object such as its location size shape and orientation all need to be processed in order to set the movement parameters that allow an accurate reach to grasp to lift movement Several brain areas work in concert to process this outstanding amount of visual information and drive the execution of a motor plan in just a few hundred milliseconds How are these processes orchestrated In developing this type of comprehensive knowledge about the interactions between objects perception and goal directed actions we have a window into the mechanisms underlying the functioning of the visuo motor system With this research topic we aim to further understand the neural mechanisms that mediate our interactions with the world Therefore we particularly encourage submission of papers that attempt to relate such findings to real world situations by investigating behavioural and neural correlates of information processing related to eye hand coordination and visually guided actions including reaching grasping and lifting movements This topic welcomes submissions of original research using any relevant techniques and methods from behavioural kinematics kinetics to neuroimaging and transcranial magnetic stimulation TMS as well as neuropsychological studies     *Arts & Decoration* ,1928     [Current Index to Journals in Education](#) ,1999-04     **Current Biography Yearbook** ,1984     [Current Biography Yearbook](#) Charles Moritz, 1984
