**General Aptitude Compulsory Solved Papers** YCT Expert Team , 2023 24 NTA CSIR NET JRF PART A General Aptitude Compulsory Solved Papers      Nanoweapons Louis A. Del Monte,2017 Nanoweapons just might render humanity extinct in the near future a notion that is frightening and shocking but potentially true In Nanoweapons Louis A Del Monte describes the most deadly generation of military weapons the world has ever encountered With dimensions one thousandth the diameter of a single strand of human hair this technology threatens to eradicate humanity as it incites world governments to compete in the deadliest arms race ever In his insightful and prescient account of this risky and radical technology Del Monte predicts that nanoweapons will dominate the battlefield of the future and will help determine the superpowers of the twenty first century He traces the emergence of nanotechnology discusses the current development of nanoweapons such as the mini nuke which weighs five pounds and carries the power of one hundred tons of TNT and offers concrete recommendations founded in historical precedent for controlling their proliferation and avoiding human annihilation Most critically Nanoweapons addresses the question Will it be possible to develop deploy and use nanoweapons in warfare without rendering humanity extinct      **Social Entrepreneurship in the Middle East** Dima Jamali,Alessandro Lanteri,2016-04-29 This two volume book unveils trends strengths weaknesses and overall dynamics and implications of social entrepreneurship in the Middle East region whilst identifying both opportunities and threats facing social entrepreneurship and supplements through a wealth of insights and examples inspired from practice and current applications      **The Patient Will See You Now** Eric Topol,2016-10-25 The essential guide by one of America s leading doctors to how digital technology enables all of us to take charge of our health A trip to the doctor is almost a guarantee of misery You ll make an appointment months in advance You ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes Then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves And your bill will be astronomical In The Patient Will See You Now Eric Topol one of the nation s top physicians shows why medicine does not have to be that way Instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system The change is powered by what Topol calls medicine s Gutenberg moment Much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare With smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best Medicine has been digitized Topol argues now it will be democratized Computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable Massive open online

medicine where diagnostics are done by Facebook like comparisons of medical profiles will enable real time real world research on massive populations There s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy Nevertheless the result better cheaper and more human health care will be worth it Provocative and engrossing *The Patient Will See You Now* is essential reading for anyone who thinks they deserve better health care That is for all of us      **Unforgettable** W. Michael

Gray,2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In *Unforgettable*

*Enabling Deep and Durable Learning* a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be *Why the Best College Teachers Do What They Do* because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges      **The Politics of Digital India** Pradip Ninan Thomas,2019-07-11 Transforming India into a digital

state has been an objective of successive governments in India However the digital by its very nature is a capricious multi dimensional entity Its operationalization across multiple sectors in India has highlighted the fact that the digital compact with publics in India is a two edged sword On the one hand devices such as mobile phones have enabled access and efficiencies and on the other they have increased the scope for surveillance capitalism and the expansion of governmentality The digital is at the same time a resource commodity and process that is absolutely fundamental to most if not all productive forces across multiple sectors As a part of the *Media Dynamics in South Asia* series this volume explores the making of digital India and specifically deals with the contradictions of an imperfect democracy internal compulsions and external pressures that continue to play crucial roles in the shaping of the same Mindful of the key roles played by political economy and context and based on conversations with theory and practice it makes a case for critical understanding of the digital embrace in India

*Applying Dialogic Pedagogy* Cynthia Z. Cohen,2018-08-15 Recent academic research criticizes the effectiveness of traditional lecturing methods and instead shows the pedagogical effectiveness of active learning methods especially discussion based education Drawing on the dialogic writings of Bakhtin Freire and Habermas this study reviews the five primary themes cited in active learning research improvements in student concentration socialization in disciplinary norms scaffolding towards higher critical thinking inclusion of non traditional learning styles and reduction of student absenteeism Testing these findings in a discussion based undergraduate college education classroom this study finds significant improvements towards higher critical thinking skills increased student concentration and reduced student absenteeism

However the study finds questionable effectiveness of discussion based teaching for socializing undergraduate college education students in disciplinary norms     Annual Report for the Year ... India. University Grants Commission,2013
