

**MEADE****NG60-BP Telescope**

## 60mm Compact Telescope with Backpack

Meade's new 60mm diameter NG delivers excellent light-gathering for bright images and great detail. Moon craters by the hundreds, cloud belts on Jupiter, and Saturn's rings are just the beginning of what can be seen with this telescope. The Meade NG60-BP is easy to carry, quick to set-up, lightweight and portable so you're always ready to explore the world around you. Go to any star party anywhere in the world and you'll see more Meade telescopes than any other.

### **Comes with AutoStar Suite™ Astronomer Edition Software on DVD**

AutoStar Suite Astronomer Edition software will help you learn the night sky. It displays more than 10,000 celestial objects including planets, stars, galaxies and nebulae. You can print out star charts and even plan your observing sessions. It operates on any Windows® based PC.

Also includes Instructional Videos. You'll be up and running in no time. The universe is waiting.

## FEATURES

- **Slow Motion Controls on Both Axes**  
Find and track objects easily with precision controls
- **Includes High Quality Expedition Backpack**  
Comfortable backpack holds everything you need to explore the world around you
- **Lightweight aluminum tripod**  
Holds everything steady without sacrificing portability

## **A User's Guide to the Meade LXD55 and LXD75 Telescopes**

Martin Peston,2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade s Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope

**A User's Guide to the Meade LXD55 and LXD75 Telescopes** Martin Peston,2011-09-17 This book offers a comprehensive introductory guide to choosing and using a series LXD55 or LXD75 computer controlled goto telescope containing a wealth of useful information for both beginners and more advanced practical amateur astronomers The manufacturer s manuals are not nearly detailed enough to be of real help to beginners No other book offers advanced techniques for more experienced LXD series users

## **So You Want a Meade LX Telescope!** Lawrence Harris,2010-07-20

*Computers and Astronomy* Perhaps every generation of astronomers believes that their telescopes are the best that have ever been They are surely all correct The great leap of our time is that computer designed and machined parts have led to more accurately made com nents that give the astronomer ever better views The manual skills of the craftsman mirror grinder have been transformed into the new age skills of the programmer and the machine maker The new products did not end the work of craftsman te scope makers though Many highly skilled amateur professional opticians cont ued to produce good quality mirrors that are still seen today Amateur priced telescopes are now capable of highly accurate tracking and computer control that were once only the province of professionals This has greatly increased the p sibilities of serious astronomy projects for which tailor made software has been developed Add a CCD camera to these improved telescopes see Chap 3 and you bring a whole new dimension to your astronomy see Fig 1 1 Look Before You Leap But first a word of caution Unless you are already familiar with astronomy and basic telescopes it is not wise to start spending large amounts of money on a we featured telescope Such an instrument might otherwise be subsequently abandoned due to a perceived overcomplexity coupled with a waning interest
