Copyright Office, 1961-07 **Catalog of Copyright Entries** Library of Congress. Copyright Office, 1961 *Antec 2001*, *The Publishers' Trade List Annual*, 1979 *Whitaker's Books in Print*, 1990 *Affordable Metal-Matrix Composites for High Performance Applications II* Awadh B. Pandey, Kevin L. Kendig, Thomas J. Watson, 2013-09-23 This book will include papers on recent research carried out in the field of metal matrix composites MMCs Processing microstructure and mechanical properties of MMCs and unreinforced matrix alloys will be covered with a focus on aluminum titanium nickel and copper MMCs Those involved in the research of MMCs and unreinforced alloys particularly in aerospace space and automotive materials research will find this volume indispensable From Materials Science Technology 2003 to be held in Chicago Illinois November 9 12 2003 **Aerospace Materials and Material Technologies** N. Eswara Prasad, R.J.H. Wanhill, 2016-11-07 This book serves as a comprehensive resource on various traditional advanced and futuristic material technologies for aerospace applications encompassing nearly 20 major areas Each of the chapters addresses scientific principles behind processing and production production details equipment and facilities for industrial production and finally aerospace application areas of these material technologies The chapters are authored by pioneers of industrial aerospace material technologies This book has a well planned layout in 4 parts The first part deals with primary metal and material processing including nano manufacturing The second part deals with materials characterization and testing methodologies and technologies The third part addresses structural design Finally several advanced material technologies are covered in the fourth part Some key advanced topics such as Structural Design by ASIP Damage Mechanics Based Life Prediction and Extension and Principles of Structural Health Monitoring are dealt with at equal length as the traditional aerospace materials technology topics This book will be useful to students researchers and professionals working in the domain of aerospace materials **Structure and Properties of Nispan-C and Some of Its Applications** Kishore T. Kashyap, 1983 **Books in Print**, 1991 **Sputtering Materials for VLSI and Thin Film Devices** Jaydeep Sarkar, 2010-12-13 An important resource for students engineers and researchers working in the area of thin film deposition using physical vapor deposition e g sputtering for semiconductor liquid crystal displays high density recording media and photovoltaic device e g thin film solar cell manufacturing This book also reviews microelectronics industry topics such as history of inventions and technology trends recent developments in sputtering technologies manufacturing steps that require sputtering of thin films the

properties of thin films and the role of sputtering target performance on overall productivity of various processes Two unique chapters of this book deal with productivity and troubleshooting issues The content of the book has been divided into two sections a the first section Chapter 1 to Chapter 3 has been prepared for the readers from a range of disciplines e g electrical chemical chemistry physics trying to get an insight into use of sputtered films in various devices e g semiconductor display photovoltaic data storage basic of sputtering and performance of sputtering target in relation to productivity and b the second section Chapter 4 to Chapter 8 has been prepared for readers who already have background knowledge of sputter deposition of thin films materials science principles and interested in the details of sputtering target manufacturing methods sputtering behavior and thin film properties specific to semiconductor liquid crystal display photovoltaic and magnetic data storage applications In Chapters 5 to 8 a general structure has been used i e a description of the applications of sputtered thin films sputtering target manufacturing methods including flow charts sputtering behavior of targets e g current voltage relationship deposition rate and thin film properties e g microstructure stresses electrical properties in film particles While discussing these topics attempts have been made to include examples from the actual commercial processes to highlight the increased complexity of the commercial processes with the growth of advanced technologies In addition to personnel working in industry setting university researchers with advanced knowledge of sputtering would also find discussion of such topics e g attributes of target design chamber design target microstructure sputter surface characteristics various troubleshooting issues useful Unique coverage of sputtering target manufacturing methods in the light of semiconductor displays data storage and photovoltaic industry requirements Practical information on technology trends role of sputtering and major OEMs Discussion on properties of a wide variety of thin films which include silicides conductors diffusion barriers transparent conducting oxides magnetic films etc Practical case studies on target performance and troubleshooting Essential technological information for students engineers and scientists working in the semiconductor display data storage and photovoltaic industry
