Administration - Unraveled, Revealing a Unified General Theory George McCleskey,2011-12-06 Governing Authority Board of Directors Owner etc is responsible for the enterprise and should exert control of its General Interest through Governing Objectives and to assure conformity with accepted standards of proper business conduct customs conventions and societies legal degrees of freedom and constraints such as laws statutes ordinances regulations etc The Governing Authority should be functional and

operative and not just ceremonial and must possess the capability to determine and guide the General Interest of the enterprise. They should not simultaneously serve as members of the Administration. These are mutually exclusive responsibilities and accountabilities. Governing Objectives are the means through which Governing Authority regulates and audits the compliance of Administration and Management with the General Interest of the enterprise. Ethical standards of business conduct should be specifically established through Governing Objectives. Profit should not be the only objective of the enterprise. Administration is a system of principle and process and not one of formula and numbers. It is the means through which the functions necessary to develop, operate or analyze an enterprise, including those that use formula and numbers, are accomplished. These include management, financial, accounting, manufacturing, commercial, technical, personnel, security, and whatever else may be necessary for the intended purpose. Administration is useful in all manner of human society for all varieties of enterprise, such as public, business, military, hospital, education, etc. Its use for the design, operation or analysis of an enterprise will yield the best possible result consistent with the abilities and diligence of the designer, operator or analyst. At least 32 principles and related processes should be consciously and appropriately considered in establishing, operating or analyzing an enterprise. Most developers, operators and analysts of enterprises are not or have not been consciously aware of the 32 administration principles and related processes. Relevant principles not consciously considered in developing and operating an enterprise will naturally, rationally and unavoidably self-implement with random, undefined and unintentional results. Superior enterprise leadership is unlikely if based only on technical or professional on-the-job proficiencies without a sound philosophy of administration. An enterprise professional has a sound philosophy of administration and a broad fundamental basis for effective thinking. Bureaucracy, the name given to the hierarchical organization of specialties that results from the progressive subdivision of authority and work, is a natural, rational and unavoidable enterprise characteristic that is possessed in variably significant and substantial degrees by all formal enterprises. The more closely that Weber's ideal monocratic bureaucracy is approximated in the design and operation of an enterprise, the greater will be the ability of the Governing Authority, Administration and Management to serve the General Interest of the enterprise. Most employees will become indifferent. They will eventually exchange their work for the available compensation and gratification and develop a benign indifference to enterprise objectives in the unilateral bargain. Administration and Management are not interchangeable. Administration delegates and distributes Authority and Objectives to Management. Management guides and directs the operation of the enterprise for the implementation of objectives through the principles of the Administrative Process. There is good regulation, bad regulation, under regulation and over regulation, but there is no such condition as too much good regulation in the conduct of human affairs.

Mey, 2015-07-31 This volume is part of the series Pragmatics Philosophy and Psychology edited for Springer by Alessandro Capone It is intended for an audience of undergraduate and graduate students as well as postgraduate and advanced researchers This volume focuses on societal pragmatics One of the main concerns of societal pragmatics is the world of language users We are interested in the investigation of linguistic practices in the context of societal practices praxis to use a term used in the Wittgensteinian and other traditions It is clear that the world of users including their practices their culture and their social aims has to be taken into account and seriously investigated when we deal with the pragmatics of language It is not enough to discuss principles of language use solely in the guise of abstract theoretical tools Consequently the present volume focuses explicitly on the interplay of abstract theoretical principles and the necessities imposed by societal contexts often requiring a more flexible use of such theoretical tools The volume includes articles on pragmemes politeness and anti politeness dialogue joint utterances discourse markers pragmatics and the law institutional discourse critical discourse analysis pragmatics and culture cultural scripts argumentation theory connectives and argumentation language games and psychotherapy slurs the analysis of funerary rites as well as an authoritative chapter by Jacob L Mey on societal pragmatics

The Search for Harmony Gene Allred Sessions, Craig J. Oberg, 1993 The conservatives science often seems to be at cross purposes with God as anthropologists dig up hominids astronomers talk about the end of the universe quantum physicists dismiss the possibility of prophecy and genetic researchers produce offspring from a single parent Traditionalists wonder where the divine order is in all of this There was a time when Latter day Saints seemed impervious to such theological conundrums The assumption was that LDS teachings were scientific and that research would prove the truth of Mormonism Books were written about rational theology and Joseph Smith as scientist Students at church schools celebrated Darwin s birthday without hint of controversy believing that evolution confirmed eternal progression In *The Search for Harmony* fifteen scholars document the striking reversal over the past half century beginning with Joseph Fielding Smith s and James E Talmage s clash over the age of the earth Although the church sided with Talmage at the time the membership eventually accepted Smith s views and the rhetoric of other church leaders sermons became increasingly hostile toward empiricism Contributors suggest that this antagonism could be averted to the benefit of the church They explain why in light of the details of both science and LDS
