Global Agriculture and the American Farmer Kimberly Ann Elliott, 2017-06-27 The United States is one of the world s largest producers and exporters of a range of agricultural commodities and the largest provider of foreign assistance so U S policies have big effects on global food security and other global public goods linked to agriculture On the positive side of the ledger President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty which are mostly rural But that generosity is undercut by U S support for farmers that distorts global markets and ignores negative spillovers for the rest of the world In this book Elliott focuses on three policy areas that are particularly damaging for developing countries traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere the biofuels mandate which in its current form increases market volatility while doing little if anything to mitigate climate change and weak regulation of antibiotic use in livestock which contributes to the global spread of drug resistant super bugs While noting that broad reforms are needed to fix these problems Elliott also identifies practical steps that U S policymakers could take in the relatively short run to improve farm policies for American taxpayers and consumers as well as for the poor and vulnerable in developing countries

Hunt, 2015-10-05 The local food movement is one of the most active of current civil engagement social movements This work presents primary evidence from over 900 documents interviews and participant observations and provides the first descriptive history of local food movement national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements It provides a US UK comparative context significantly updating earlier comparisons of American British and European farm and rural policies The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences General Catalogue of Printed Books to 1955 British Museum.
