New Media Dramaturgy Peter Eckersall, Helena Grehan, Edward Scheer, 2017-04-28 This book illuminates the shift in approaches to the uses of theatre and performance technology in the past twenty five years and develops an account of new media dramaturgy NMD an approach to theatre informed by what the technology itself seems to want to say Born of the synthesis of new media and new dramaturgy NMD is practiced and performed in the work of a range of important artists from dumb type and their 1989 analog industrial machine performance pH to more recent examples from the work of Kris Verdonck and his A Two Dogs Company Engaging with works from a range of artists and companies including Blast Theory Olafur Eliasson Nakaya Fujiko and Janet Cardiff we see a range of extruded performative technologies operating overtly on with and against human bodies alongside more subtle dispersed interactive and experiential media

Pinter's World William Baker, 2018-09-15 Pinter's World Pinter and Company is not a full scale biography but a series of illuminating chapters about Pinter's life character and thought employing new information found in his Appointment Diaries recent

biographical sources such as Simon Gray's memoirs and Henry Woolf's reminiscences in addition to personal discussions with several in Pinter's world. This book provides a fresh illumination of Pinter's life and art: his friendships, obsessions, and concerns. Material is arranged around themes: key concerns, Pinter's activities, Pinter's meetings and endeavors, for instance, with whom he met and when, when he wrote what and when, and his perspective at the time are documented. This work explores Pinter's writing: drama, poetry, prose, journalism, and letters, which are here regarded as part of his aesthetic achievement. *Pinter's World*: Pinter and Company presents a pointillist portrait of him through examining central concerns in his life. These encompass an obsession with the theater and games, delight in restaurants, demonstrating that Pinter is far removed from the socially awkward, isolated figures populating his early work, and the women in Pinter's world. Other areas examined include Pinter's political engagement from his adolescence to his last years, and the literary and other creative influences upon him. This work draws upon consultation of his papers at the British Library, including letters to others, especially close friends with whom he kept close contact for over half a century. These letters should be regarded on par with his other creative accomplishments. Pinter was a fascinating letter writer whose letters reveal thoughts at the time of writing, often in abrupt, most colorful idiomatic language. His *Appointment Diaries* cannot reveal what actually occurred during his meetings, but they do provide a guide to what he did on a daily basis and whom he met. Memories from his friends, his professional colleagues, cricket players, and his second wife, Antonia Fraser, illuminate Pinter's personality and actions. Pinter's first literary love was poetry, and unlike most other Pinter studies, this one gives attention to his neglected poetic output that often reveals the real Pinter and the enigma that is at the heart of every great artist.

Reimagining Industrial Sites Catherine

Heatherington, 2017-12-06 The discourse around derelict former industrial and military sites has grown in recent years. This interest is not only theoretical; landscape professionals are taking new approaches to the design and development of these sites. This book examines the varied ways in which the histories and qualities of these derelict sites are reimagined in the transformed landscape and considers how such approaches can reveal the dramatic changes that have been wrought on these places over a relatively short time scale. It discusses these issues with reference to eleven sites from the UK, Germany, the USA, Australia, and China, focusing specifically on how designers incorporate evidence of landscape change, both cultural and natural. There has been little research into how these developed landscapes are perceived by visitors and local residents. This book examines how the tangible material traces of pastness are interpreted by the visitor and the impact of the intangible elements: hidden traces, experiences, and memories. The book draws together theory in the field and implications for practice in landscape architecture and concludes with an examination of how different approaches to revealing and reimagining change can affect the future management of the site.
