Organized on the subject strands of the Common Core, this book explores math concepts featured in contemporary films and television shows and offers numerous examples high school math teachers can use to design lessons using pop culture references. *Intelligent Computer Mathematics* Cezary Kaliszyk, Edwin Brady, Andrea Kohlhaase, Claudio Sacerdoti Coen, 2019-07-02  
This book constitutes the refereed proceedings of the 12th International Conference on Intelligent Computer Mathematics CICM 2019 held in Prague, Czech Republic in July 2019. The 19 full papers presented were carefully reviewed and selected from a total of 41 submissions. The papers focus on digital and computational solutions which are becoming the prevalent means for the generation, communication, processing, storage, and curation of mathematical information. Separate communities have developed to investigate and build computer-based systems for computer algebra, automated deduction, and mathematical publishing, as well as novel user interfaces. While all of these systems excel in their own right, their integration can lead to synergies offering significant added value.
