One Currency, Two Europes: Towards A Dual Eurozone Bruno Dallago, 2016-05-24 The aftermath of the US subprime mortgage crisis in 2008 saw its influence spread around the world including Europe The European crisis turned out to be longer deeper and more resilient than anticipated An unexpected consequence was the increasingly divergent economic and financial situation of two main groups of countries within the Eurozone which includes the countries that adopt the euro as their common currency The divergence was caused by a number of factors fundamentally stemming from the dissimilar economic and financial situation of its member countries and from the incomplete institutional architecture and the monetary and fiscal policies in the Eurozone One Currency Two Europes Towards a Dual Eurozone seeks to explore these factors which give rise to the Eurozone's asymmetric composition and the growing difficulties and ineffectiveness that policies meet It presents evidence to show how the presently incomplete institutional architecture of the Eurozone is the main reason for the extreme detrimental effects of the international crisis and austerity policies along with the asymmetric economic situation and the insufficient mutual trust demonstrated by the vulnerable as well as resilient countries Other than presenting a complete overview and analysis of the events that unfolded in the Eurozone as a result of the financial crisis that first emerged in the US this book also suggests possible solutions which could help to reunify the Eurozone and make the common currency sustainable and beneficial for all member countries One Currency Two Europes will be useful for policymakers who want to learn from the Eurozone's experience with the financial crisis and the importance of complete institutional architectures and inter country economic convergence It will also serve as a reference to students and researchers who would like more in depth analysis of the crisis and the Eurozone's fiscal

monetary and institutional past present and future **Artificial Intelligence and Security** Xingming Sun,Zhaoqing Pan,Elisa Bertino,2019-07-18 The 4 volume set LNCS 11632 until LNCS 11635 constitutes the refereed proceedings of the 5th International Conference on Artificial Intelligence and Security ICAIS 2019 which was held in New York USA in July 2019 The conference was formerly called International Conference on Cloud Computing and Security with the acronym ICCCS The total of 230 full papers presented in this 4 volume proceedings was carefully reviewed and selected from 1529 submissions The papers were organized in topical sections as follows Part I cloud computing Part II artificial intelligence big data and cloud computing and security Part III cloud computing and security information hiding IoT security multimedia forensics and encryption and cybersecurity Part IV encryption and cybersecurity *Capacity Mechanisms in the EU Energy Market* Leigh Hancher,Adrien de Hauteclocque,Malgorzata Sadowska,2015-09-24 Ensuring an adequate long term energy supply is a paramount concern in Europe EU member states now intervene by encouraging investment in generation capacity offering an additional revenue stream for conventional power plants in addition to the existing heavily subsidised investments in renewable energy sources These capacity remuneration mechanisms or simply capacity mechanisms have become a hot topic in the wider European regulatory debate European electricity markets are increasingly interconnected so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets If these mechanisms are adopted by several member states with no supra national coordination and no consideration for their cross border impact they may cause serious market distortions and put the future of the European internal electricity market at risk This book provides readers with an in depth analysis of capacity mechanisms written by an expert team of policy makers economists and legal professionals It will be a first point of reference for regulators and policy makers responsible for designing optimal capacity mechanisms in Europe and will be an invaluable resource for academics and practitioners in the fields of energy regulation and competition *Cybersecurity in the European Union* George Christou,2016-01-26 Cybercrime affects over 1 million people worldwide a day and cyber attacks on public institutions and businesses are increasing This book interrogates the European Union s evolving cybersecurity policies and strategy and argues that while progress is being made much remains to be done to ensure a secure and resilient cyberspace in the future **Defying the Dragon** Stephen Vines,2021-04-08 Defying the Dragon tells a remarkable story of audacity of how the people of Hong Kong challenged the PRC s authority just as its president reached the height of his powers Is Xi s China as unshakeable as it seems What are its real interests in Hong Kong Why are Beijing s time honoured means of control no longer working there And where does this leave Hongkongers themselves Stephen Vines has lived in Hong Kong for over three decades His book shrewdly unpacks the Hong Kong China relationship and its wider significance right up to the astonishing convergence of political turmoil and international crisis with Covid 19 and the 2020 21 crackdown Vividly describing the uprising from street level Vines explains how and why it unfolded and its global repercussions Now the

international community is reassessing relations with Beijing just as Hong Kong's rebellion and China's handling of the pandemic have exposed the regime's weakness. In a crisis that has become existential all round what lies ahead for Hong Kong, China and the world. The World's Paper Trade Review, 1921

Interest limitation for tax legislation in the European Union. An obstruction of fundamental freedoms? The Duy Anh Nguyen, 2023-07-31 Bachelor Thesis from the year 2022 in the subject Law Tax Fiscal Law grade 2.0 Rhine-Waal University of Applied Sciences language English abstract Tax planning is a practice used by many corporations in order to minimise their tax paid while being able to maximise their profits. One common way to undertake such conduct is by increasing the negative components of the tax base computation for example the interest expense deductibility. This practice is deemed harmful by many lawmakers as it will imperil its tax legislation. Hence to tackle this behaviour the European Union has adopted an Anti Tax Avoidance Directive in 2016 where the rules on interest expense as a tax planning tool are addressed in Article 4. The Directive is to be transposed into the Member States tax laws. Nevertheless there are some concerns on the comparability between the national rules implementing this Directive and the existing fundamental freedoms that are the cornerstone of the European Union. This thesis examines the possible infringements of the Directive's transposition to the fundamental freedoms enshrined in the Treaty of the Functioning of the European Union. Some recommendations with regard to ameliorating the identified incompatibilities are also given by using comparative legal research. Special Papers, 1934
