Motivation and Emotion (PLE: Emotion) Phil Evans, 2014-11-20 Originally published in 1989 this title provided a wide ranging and up to date review of a traditional area of psychology It will be of great interest to all those who wish to discover what governs human behaviour and feeling in other words what makes people tick Phil Evans explores the influences that determine a range of behaviour from those with clear biological links such as eating sleeping and sexual activity to those specifically human concerns such as the need to achieve success or approval He also analyses the feelings and emotions that often guide behaviour He gives a detailed outline of various theoretical perspectives on what it is to be a human being whether a biological organism with biological needs a responder to environmental signals of pleasure or a cognitively aware agent continuously processing information regarding current circumstances His review of both cognitive and biosocial approaches conveys the liveliness of debate and argument within psychology at the time and demonstrates that an understanding of all views is necessary to illuminate fully the complex nature of human behaviour
