Tomlinson,2018-02-22 Film cameras the bodies themselves have little to do with image quality Lenses are far more important to image quality than camera bodies So as long as your camera has accurate shutter speeds aperture settings and metering the brand you pick doesn t really have much of an effect upon the final image So then it appears the model camera you choose is irrelevant Well no The type of film SLR camera you choose is most important to you as the photographer in features and convenience Comfort has a lot to do with how good you are as a photographer What I mean by that is that you choose a camera that feels comfortable in your hands and becomes an extension of your brain as a photographer This makes it easier to capture the types of images you want **Analog Photography** Bo Belvedere Christensen,2022-03-29 Photography on analog film has simply put received a recent renaissance In our digital age I guess a romantic veil surrounds the analog approach to photography Even when shooting digital cameras we do postprocessing to simulate the look of analog film We talk about the specific and beloved look of certain films and how their sensitivity and grain add a charm to the image Delving deeper a reason for the analog renaissance might be our growing desire to slow down to immerse ourselves and sharpen our creative senses by restraining the means with which we photograph Where the digital camera is soon so perfect that we as photographers can sometimes feel redundant the analog camera requires our undivided presence These cameras are subject to the same limitations as they were in the dawn of photography You must visualize what you want to create beforehand and you cannot rely on an lcd to feed you the result Thus in analog photography we are forced to slow down plan create the right circumstances and capture the wanted picture at the decisive moment *Popular Photography* ,1984-04 **The EBay Price Guide** Julia L.
