Financing Higher Education in Africa World Bank,2010-04-21 The training and development of human capital in Sub Saharan Africa SSA will help countries in the region diversify their economies carry out economic transformation and support sustainable growth Higher education plays a key role in training qualified individuals who will be able to implement new technologies and use innovative methods to establish cost efficient and effective enterprises and institutions However in order for SSA to reap the benefits of this investment in human capital higher education institutions must secure financing to provide quality training and sound professional prospects to their students Currently tertiary education development is unsustainable resources per student are declining and the quality of education is affected These issues are particularly pressing in times of financial global crisis when available resources for tertiary education tend to diminish The impact of the crisis that started in 2008 provides a clear illustration of the need to explore innovative ways to diversify and secure financing for higher education in SSA *Financing Higher Education in Africa* provides a comprehensive overview of higher education financing in SSA The book begins with an explanation of the fundamental problems faced by higher education institutions and students in SSA namely the combined pressure of a rapid growth in demand and a growing scarcity of public resources and it presents the dramatic consequences of these trends on quality The book then turns to analyzing and comparing the current funding policies in SSA countries and it provides recommendations for improvement Finally the book examines the alternatives to the status quo and the policy tools needed to both diversify resources and allocate them based on performance It will be of great interest to governments universities research institutions and international organizations throughout the region *Higher Education Admission Practices* María Elena Oliveri,Cathy Wendler,2020-01-30 Reveals practices and issues in higher education admissions which are critical factors for improving worldwide access and equity

Cost Sharing in Public Higher Education Institutions in Ethiopia with Special Emphasis on Addis Ababa and Adama Universities Wanna Leka,Desalegn Chalchisa,2012 The main purpose of this study was to investigate the impact of cost sharing scheme in enhancing revenue generation in public higher education in Ethiopia in order to improve the quality of the teaching and learning environment Furthermore the study has attempted to assess problems challenges experienced by students as well as other government bodies related to cost sharing scheme To this effect both quantitative and qualitative research approaches were used *Sharing Higher Education's Promise beyond the Few in Sub-Saharan Africa* Peter Darvas,Shang Gao,Yijun Shen,Bilal Bawany,2017-11-15 Despite a spectacular expansion of the higher education sector in Sub Saharan Africa the supply of tertiary education has generally failed to keep pace with demand and the region continues to lag all other regions in terms of access to tertiary education This is in part a consequence of deeply entrenched patterns of inequitable access to higher education and the perpetuation of what researchers refer to as elite systems To date access to tertiary education in Sub Saharan Africa has unduly benefitted students drawn from the region s wealthiest households and

overall enrollment remains disproportionately male and metropolitan. These factors stifle the catalytic potential of higher education, corroding its potential for driving economic growth and sustaining poverty reduction. Instead, patterns of access to tertiary education have generally reinforced and reproduced social inequality instead of eroding its pernicious social and economic effects. This report aims to inform an improved understanding of equity in tertiary enrollment in Sub-Saharan African countries and to examine the extent to which inequity functions as a bottleneck inhibiting the ability of African universities to effectively drive improvements in overall quality of life and economic competitiveness. In our survey of the evidence, we also aim to identify which policies most effectively address the challenge of promoting equity of access in SSA tertiary education systems. In order to achieve these objectives, the report collects, generates, and analyzes empirical evidence on patterns of equity, examines the underlying causes of inequity, and evaluates government policies for addressing inequity.

Uganda Confidential, 2001 **Differentiation and Articulation in Tertiary Education Systems** Njuguna

Ng'ethe, George Subotzky, George Afeti, 2008-01-01. This title explores an area of tertiary education that is currently understudied: this is the extent and nature of differentiation and articulation in African tertiary education systems. The overall finding is that the binary system is dominant, characterised by universities and polytechnics as distinct types of institutions. Differentiation is clearly evident in Africa. However, though varied in nature and extent, the differentiation is mostly horizontal as opposed to vertical. Articulation, on the other hand, seems to be in its infancy as some universities in their admission requirements do.

Issues of Governance, Security, and Development in Contemporary Africa Mohamed Saliou Camara, Alem Hailu, Sabella O. Abidde, 2023-12-15. Governance, security, and development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country, a region, or in the case of Africa, a continent from a colonial past to a neocolonial and meta-colonial present and toward a future of strategic, optimal independence and self-reliance. That colonial past and the ensuing neocolonial and meta-colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent. For this reason, *Issues of Governance, Security, and Development in Contemporary Africa* offers an in-depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas, as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges. Using case studies involving a range of countries across the continent, Mohamed Saliou Camara, Alem Hailu, and Sabella O. Abidde argue that Africa needs to decolonize the terms of reference that guide its nation-building, statecraft, and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development.

Agriculture in Uganda: General information Joseph K. Mukiibi, 2001. The first comprehensive account of agriculture in Uganda was made in 1940 and updated in 1970. Since that publication, agriculture in Uganda has undergone a number of

developments taking advantage of the economic and technical changes now available In this context the National Agricultural Research Organisation NARO and the CTA have written a new four volume series focussing on the strategic issues facing agriculture It is written for farmers and agro based industrialists as well as researchers civil leaders and NGOs universities and collaborating partners in agricultural research and development in Uganda and more broadly in sub Saharan Africa It aims to provide guidelines for increased and sustainable agricultural production and productivity This the first volume provides background information to the physical environment research techniques and methodology and marketing and agricultural technology in anticipation of the next three volumes Crops Forestry and Livestock and Fisheries

Young Entrepreneurs in Sub-Saharan Africa Katherine V. Gough, Thilde Langevang, 2016-03-02 Young people in sub Saharan Africa are growing up in rapidly changing social and economic environments which produce high levels of un and underemployment Job creation through entrepreneurship is currently being promoted by international organizations governments and NGOs as a key solution despite there being a dearth of knowledge about youth entrepreneurship in an African context This book makes an important contribution by exploring the nature of youth entrepreneurship in Ghana Uganda and Zambia It provides new insights into conceptual and methodological discussions of youth entrepreneurship as well as presenting original empirical data Drawing on quantitative and qualitative research conducted under the auspices of a collaborative interdisciplinary and comparative research project it highlights the opportunities and challenges young people face in setting up and running businesses Divided into a number of clear sections each with its own introduction and conclusion the book considers the nature of youth entrepreneurship at the national level in both urban and rural areas in specific sectors including mobile telephony mining handicrafts and tourism and analyses how key factors such as microfinance social capital and entrepreneurship education affect youth entrepreneurship New light is shed on the multi faceted nature of youth entrepreneurship and a convincing case is presented for a more nuanced understanding of the term entrepreneurship and the situation faced by many African youth today This book will be of interest to a wide range of scholars interested in youth entrepreneurship including in development studies business studies youth studies and geography as well as to development practitioners and policy makers The Open Access title has now been added to the Open Access page <http://www.tandfebooks.com/page/openaccess>
