La Mystique De La Croissance Comment Sen Liberer:

La Mystique de la croissance Dominique Méda, 2014-09-03T00:00:00+02:00 Alors que les pays occidentaux font face à une crise économique et sociale, de nombreux responsables politiques et experts attendent le salut du seul retour de la croissance. Pourtant, si celle-ci revenait, elle contribuerait à réaggraver la menace écologique à laquelle le monde est confronté. Comment sortir de cette contradiction ? En comprenant pourquoi et comment nous sommes devenus des sociétés fondées sur la croissance. En tirant toutes les conséquences du caractère anachronique et pervers des indicateurs tels que le PIB, qui sont devenus nos fétiches. En mettant au cœur de l'action publique ce qui compte pour inscrire nos sociétés dans la durée. La reconversion écologique est le seul moyen de maintenir des conditions de vie authentiquement humaines sur Terre, mais elle suppose de rompre avec une partie de nos croyances liées à l'avènement de la modernité : le caractère intrinsèquement bon de la maximisation de la production, le progrès confondu avec l'augmentation des quantités, la passion de l'enrichissement personnel. Elle exige aussi de mettre un terme à la prétention de l'économie d'être seule à sauver le monde que nous voulons. **Création Studio Flammarion** Flammarion 2013 pour l'édition originale Flammarion 2014 pour la présente édition en coll. Process Engineering Renewal 3 Éric Schaer, Jean-Claude André, 2020-07-17 Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries. Its success is incontrovertible with the exponential increase in techniques and innovations. Rapid advances in new technologies such as artificial intelligence, as well as current societal needs, sustainable development, climate change, renewable energy, the environment, are developments that must be taken into account in industrial renewal. **Process Engineering Renewal 3** presents a prospective analysis that demonstrates the significant disruptions linked to sustainable development, global warming, etc. These constraints may trigger changes in the social regulation system, which in turn applies pressure on actors of process engineering to evolve and adapt to these developments.

Process Engineering Renewal 1 Éric Schaer, Jean-Claude André, 2020-04-09 Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries. Its success is incontrovertible with the exponential increase in techniques and innovations. Rapid advances in new technologies such as artificial intelligence, as well as current societal needs, sustainable development, climate change, renewable energy, the environment, are developments that must be taken into account in industrial renewal. **Process Engineering Renewal 1**, the first volume of three, focuses on training, demonstrating the need for innovation in order for the field to have a framework that is sustainable in a highly changeable world.

Post-growth Economics and Society Isabelle Cassiers, Kevin Maréchal, Dominique Méda, 2017-10-30 We stand on the threshold of a post-growth world, one in which the relentless pursuit of economic growth has ceased to constitute a credible societal project. The symptoms that mark the end of an era are clear and incontrovertible: a return to the regularities of the past is illusory. The pursuit of economic growth no longer constitutes a credible societal project for ecological, social,

and geopolitical reasons Edited by an impressive array of experts this book identifies several areas in which we must fundamentally rethink our societal organisation They ask what it means to abandon the objective of economic growth how we can encourage the emergence of other visions to guide society how global visions and local transition initiatives should be connected which modes of governance should be associated with the required social and technological innovations Alongside the necessary respect of ecological limits and equity in distribution the promotion of autonomy involving all in the building of socio political norms could serve for guidance The topics addressed over the chapters range from the future of work to the de commodification of economic relations the search for new indicators of progress to decentralized modes of governance and from the circular economy to polycentric transitions Each contribution brings a unique perspective a piece of a larger puzzle to be assembled Post growth Economics and Society is an important volume to those who study ecological economics political economy and the environment and society It invites theorists as much as practitioners to re explore the roots of our societal goals and play an active role in the systemic shift to come

Coviability of Social and Ecological Systems: Reconnecting Mankind to the Biosphere in an Era of Global Change Olivier Barrière, Mohamed Behnassi, Gilbert David, Vincent Douzal, Mireille Fargette, Thérèse Libourel, Maud Loireau, Laurence Pascal, Catherine Prost, Voyner Ravena-Cañete, Frédérique Seyler, Serge Morand, 2019-03-12 This book considers the principle of sustainable development which is currently facing a growing environmental crisis A new mode of thinking and positioning the ecological imperative is the major input of this volume The prism of co viability is not the economics of political agencies that carry the ideology of the dominant conventional economic schools but rather an opening of innovation perspectives through science This volume through its four parts more than 40 chapters and a hundred authors gives birth to a paradigm which crystallizes within a concept that will support in overcoming the ecological emergency deadlock

Vivre sans le capitalisme ? Louis Moreau de bellaing, 2016-04-01 Dans cet ouvrage l auteur s efforce de montrer qu il y a dans nos soci t s modernes d mocratiques une l gitimation et une l gitimit sociales et politiques approximatives Il explique notamment que ces soci t s sont aujourd hui trou es de degr s d exc s ill gitimes mais qu elles sont surtout domin es en exc s ill gitime global par le capitalisme Les luttes se font dans les meilleurs des cas contre les exc s ill gitimes sociaux et politiques et contre ceux sp cifiques au capitalisme
