La Petite Noblesse De L'intelligence

La Petite Noblesse De L'intelligence:

La petite noblesse de l'intelligence Wilfried Lignier, 2012 Ce livre s'attache à dissiper le halo de mystère qui entoure la figure de l'enfant surdoué. D'où vient-elle ? Comment est-elle devenue en France sous le nom de précocité intellectuelle une question ducative sérieuse et officielle ? Dans quelle mesure les psychologues reconnaissent-ils cette notion ? Et surtout, qui sont ceux qui attendent et que font les parents qui ont aujourd'hui recours au quotient intellectuel (QI) pour attester la grande intelligence de leur(s) enfant(s) ? À partir d'une enquête menée notamment auprès de parents de psychologues et de militants associatifs, ce livre relie l'affirmation de cette petite noblesse de l'intelligence que constituent les enfants surdoués à un double contexte : le développement de pratiques psychologiques privées et l'augmentation de la concurrence au sein de l'école massifiée. De façon exemplaire, le cas des surdoués montre comment la psychologie clinique peut fonctionner comme une source légitime de singularisation des enfants dans les secteurs les plus indifférenciés de l'école : de la maternelle au début du collège. Cette singularisation a certes une fonction de rassurance pour des familles qui, bien que plutôt avantagées socialement, sont sujettes de vives incertitudes éducatives. Mais on ne saurait ignorer les conséquences concrètes qu'a aussi l'anoblissement psychologique : l'institution scolaire se voit pressée d'accorder aux intelligences qui la dépassent les petits privilèges qui leurs sont dus.

Genius in France Ann Jefferson, 2014-12-21 This engaging book spans three centuries to provide the first full account of the long and diverse history of genius in France. Exploring a wide range of examples from literature, philosophy and history as well as medicine, psychology and journalism, Ann Jefferson examines the ways in which the idea of genius has been ceaselessly reflected on and redefined through its uses in these different contexts. She traces its varying fortunes through the madness and imposture with which genius is often associated and through the observations of those who determine its presence in others. Jefferson considers the modern beginnings of genius in eighteenth-century aesthetics and the works of philosophers such as Diderot. She then investigates the nineteenth-century notion of national and collective genius, the self-appointed role of Romantic poets as misunderstood geniuses, the recurrent obsession with failed genius in the realist novels of writers like Balzac and Zola, the contested category of female genius and the medical literature that viewed genius as a form of pathology. She shows how twentieth-century views of genius narrowed through its association with IQ and child prodigies and she discusses the different ways major theorists including Sartre, Barthes, Derrida and Kristeva have repudiated and subsequently revived the concept. Rich in narrative detail, *Genius in France* brings a fresh approach to French intellectual and cultural history and to the burgeoning field of genius studies.

Objects to Learn about and Objects for Learning 1 Joel Bisault, Roselyne Le Bourgeois, Jean-François Themines, Mickaël Le Mentec, Céline

Chauvet-Chanoine, 2022-03-09 Resulting from a conference that took place in Amiens, France, in June 2019, this book examines the place and role of objects centered in teaching practices from kindergarten to university, both in the context of France and elsewhere. These objects for learning are considered in their physicality as productions, work or signs that are used for

learning They become objects to learn about when the object itself is the learning objective This book offers a cross disciplinary perspective linking the different disciplinary fields studied and the many reference sources used by the authors This two volume work offers an overview of current research on the subject with this first volume introducing the questions addressed and then going on to investigate the relationship between objects and languages looking at objects at the heart of early learning
