promising groundwork linking the self and CMS has been carried out many questions remain These include what features of the midline regions lead to their apparent importance in self processing How can we appropriately account for confounding factors such as familiarity or task effects in our experiments How is the self related to other features of the mind such as consciousness How is our methodology influencing our attempts to link the self and the brain The purpose of this ebook is to address some of these questions including opinions perspectives and hypotheses about the concept of the self the relationship between CMS and the self and the specific function of these brain regions in self processing It also includes original research papers describing EEG fMRI and behavioral experiments investigating different aspects of the self
