The Number Line through Guided Inquiry David M. Clark, Xiao Xiao, 2021-12-10 The Number Line through Guided Inquiry is designed to give future secondary teachers a deep understanding of the real numbers and functions on the reals By presenting just that part of the subject that underlies the high school curriculum this book offers an alternative to a standard real analysis sequence for advanced undergraduate or beginning graduate students It will give any student a much deeper understanding of the mathematics that they were taught in high school Written in a guided inquiry format this book consists of a carefully scaffolded sequence of definitions problems and theorems that guides students through each topic Readers solve the problems and prove the theorems on their own and present their results to their peers with the instructor as a mentor and a guide Students will learn not only the mathematics but also how to help others learn mathematics They will learn to think creatively and to make compelling arguments to justify their conclusions They will learn to listen critically to others and give constructive feedback Ultimately they will learn to work as a team to answer the bigger questions and build a common understanding of the broader subject *Key Maths* ,2000 *Math, Grade 2* Carson-Dellosa Publishing,2015-07-06 In Interactive Notebooks Math for second grade students will complete hands on activities about place value arrays addition and subtraction measurement time and money graphing and more The Interactive Notebooks series spans kindergarten to grade 5 Each 96 page book contains a guide for teachers who are new to interactive note taking lesson plans and reproducibles for creating notebook pages on a variety of topics and generic reproducibles for creating even more notebook pages The books focus on grade specific math or language arts skills and are aligned to current state standards **Mine the Gap for Mathematical Understanding, Grades K-2** John SanGiovanni,2016-10-31 Being an effective math educator is one part based on the quality of the tasks we give one part how we diagnose what we see and one part what we do with what we find Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students responses tell us what we need to know about next best steps In this remarkable book John SanGiovanni helps us value our young learners misconceptions and incomplete understandings as much as their correct ones because it is the gap in their understanding today that holds the secrets to planning tomorrow's best teaching SanGiovanni lays out 160 high quality tasks aligned to the standards and big ideas of grades K-2 mathematics including counting and representing numbers number relationships and comparison addition and subtraction within 100 and 1000 money and time and multiplication and division The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task 4 student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students

might do with these additional tasks It s time to break our habit of rushing into re teaching for correctness and instead get curious about the space between right and wrong answers Mine the Gap for Mathematical Understanding is a book you will return to again and again to get better at selecting tasks that will uncover students reasoning better at discerning the quality and clarity of students understanding and better at planning teaching based on the gaps you see *Using Number Lines with 5-8 Year Olds* Fran Mosley,2001 This book is your guide to getting the most out of number lines and tracks It offers activities for the main part of the mathematics lesson as well as quick and easy starters These activities enable you to use number lines to teach key mathematical topics and support children in counting and calculating **Targeting Maths** Judy Tertini,Katy Pike,2004 *Everyday Mathematics Teacher Lesson Guide Volume 1 Grade 4* Edm,University of Chicago.
