

## Naturalistic Observation Project

For this assignment you are to perform and write up a brief naturalistic observation. Follow the guidelines below:

1. Develop a hypothesis which relates to a human behavior which you believe might be tested by observing people, undisturbed, in a natural setting. You may want to develop your hypothesis in conjunction with your choice of subject and setting. Thus, if you plan to observe waiters serving in a diner, try to make a generalized prediction about the behavior you expect to see and what you believe it reveals about the behavior of waiters (e.g. waiters will pay more attention to opposite-sex patrons than same-sex patrons).

2. Choose a person and a setting for the observation. You are to spend approximately five to ten minutes watching and making a detailed record of a naive subject, gathering data which will "begin" to test your hypothesis. Plan your observational "method" to be sure you are not "discovered" (so that the "naturalistic" quality of the observation is not lost). Take notes on everything you can observe about the subject (environment and surroundings, physical appearance and dress, and all behaviors, especially those relevant to your hypothesis). After you have finished,
