Journal Of Light Construction S:

With Light Verb Constructions from Syntax to Concepts Wittenberg, Eva, 2016-09-01 This dissertation uses a common grammatical phenomenon light verb constructions LVCs in English and German to investigate how syntax semantics mapping defaults influence the relationships between language processing representation and conceptualization LVCs are analyzed as a phenomenon of mismatch in the argument structure The processing implication of this mismatch are experimentally investigated using ERPs and a dual task Data from these experiments point to an increase in working memory Representational questions are investigated using structural priming Data from this study suggest that while the syntax of LVCs is not different from other structures the semantics and mapping are represented differently This hypothesis is tested with a new categorization paradigm which reveals that the conceptual structure that LVC evoke differ in interesting and predictable ways from non mismatching structures

Light Verb Constructions as Complex Verbs Anna Pompei, Lunella Mereu, Valentina Piunno, 2023-10-24 The notion of light verb constructions has been traditionally related to the insignificance of the verb which is described as a grammatical item only codifying TAM system and features whereas the whole predicative content is thought to be conveyed by the noun This book deals with the light verb constructions as instances of complex verbs intended as multi predication but monoclausal structures This allows to deepen the actual verb lightness the effective noun predicativity as well as their effect on the cohesion of the construction The papers in this volume reflect on the concrete contribution of noun and verb to the event and argument structure and on the relevance of semantically different noun classes for the verb selection From different theoretical approaches data of a great variety of languages are investigated such as Indo European languages both modern Germanic Slavic Romance and Iranian languages and ancient Latin and Ancient Greek but also Mandarin Chinese and different polysynthetic languages e g Ket Nivkh Murrinh Patha Kiowa Bininj Gun wok Ainu The range of topics languages and perspectives presented in this book make it of great interest to both theoretical and applied linguists
