Congress. Senate. Committee on Health, Education, Labor, and Pensions, 2011 Behavioral Public Finance Edward J. McCaffery, Joel Slemrod, 2006-01-23 Behavioral economics questions the basic underpinnings of economic theory showing that people often do not act consistently in their own self interest when making economic decisions While these findings have important theoretical implications they also provide a new lens for examining public policies such as taxation public spending and the provision of adequate pensions How can people be encouraged to save adequately for retirement when evidence shows that they tend to spend their money as soon as they can Would closer monitoring of income tax returns lead to more honest taxpayers or a more distrustful uncooperative citizenry Behavioral Public Finance edited by Edward McCaffery and Joel Slemrod applies the principles of behavioral economics to government s role in constructing economic and social policies of these kinds and suggests that programs crafted with rational participants in mind may require redesign Behavioral Public

Finance looks at several facets of economic life and asks how behavioral research can increase public welfare Deborah A Small George Loewenstein and Jeff Strnad note that public support for a tax often depends not only on who bears its burdens but also on how the tax is framed For example people tend to prefer corporate taxes over sales taxes even though the cost of both is eventually extracted from the consumer James J Choi David Laibson Brigitte C Madrian and Andrew Metrick assess the impact of several different features of 401 k plans on employee savings behavior They find that when employees are automatically enrolled in a retirement savings plan they overwhelmingly accept the status quo and continue participating while employees without automatic enrollment typically take over a year to join the saving plan Behavioral Public Finance also looks at taxpayer compliance While the classic economic model suggests that the low rate of IRS audits means far fewer people should voluntarily pay their taxes than actually do John Cullis Philip Jones and Alan Lewis present new research showing that many people do not underreport their incomes even when the probability of getting caught is a mere one percent Human beings are not always rational utility maximizing economic agents Behavioral economics has shown how human behavior departs from the assumptions made by generations of economists Now Behavioral Public Finance brings the insights of behavioral economics to analysis of policies that affect us all **Working Paper Series** ,2002 **Index of Economic Articles in Journals and Collective Volumes** American Economic Association,1994 **Health Care Costs, Wages, and Aging** Louise Sheiner,1999 **Induced Retirement, Social Security, and the Pyramid Mirage** Casey B. Mulligan,2000 Does Social Security redistribute across cohorts Or is it a program for purchasing the jobs of the elderly I formalize both models showing how they have some predictions in common the most important of which is that generational accounts have the appearance of a pyramid scheme I also derive important differences between the two interpretations and compare those differences with data on the design and incidence of Social Security programs around the world Since implicit and explicit tax rates on elderly labor income are so high and so closely and positively related with the amount of Social Security spending and because substitution effects of the program can be as large as its wealth effects I conclude that Social Security s induced retirement motive is much more important for explaining differences among European countries than is the intergenerational redistribution motive Furthermore when policy at least in part designed to induce retirement its generational incidence can be very different than the incidence of a pyramid scheme even for those countries where the induced retirement motive is not the dominant one The possibility of induced retirement also makes it difficult for perpetual intergenerational redistribution to be supported as a subgame perfect political equilibrium Regulation ,2002 Current Law Index ,2007 **The Survey** ,1924 **Tax Notes International** ,1997 NBER Reporter National Bureau of Economic Research,1995 Personnel Management Abstracts ,2000 *Congressional Record* United States. Congress,2007 *Nelson Information's Directory of Investment Research* ,2006 **Ward's Business Directory of U.S. Private and Public Companies** ,1999 This multi volume set is a primary source for basic company and industry information

Names addresses SIC code and geographic location of over 135 000 U S companies are included Time Briton
Hadden, Henry R. Luce, 1999 *General Payroll Taxes* Jonathan R. Kesselman, 1997 This book considers payroll taxes for
