brought about the expected improvement in terms of sustainable business Self regulation has been unable to provide appropriate answers for unsustainable business frameworks despite empirical proof that sustainable behaviour is entirely in corporate enlightened self interest The lack of success of the soft law approach suggests that hard law regulation may be needed after all This book discusses these options alongside the issue of shareholder primacy and its externalities in corporate social and natural environment To escape the prisoner s dilemma European corporations and their global counterparts have found themselves in help is needed in the form of EU hard law to advocate sustainability through mandatory rules This book argues that the necessity of these laws is based on the first mover s advantage of such corporate law approach towards sustainable development In the current EU law environment where codification of corporate law is sought for forming and defining a general EU policy could not only help corporations embrace this self enlightened behaviour but could also build the necessary EU corporate citizenship atmosphere Considering the developments in the field of CSR as attempts to mitigate negative externalities resulting from inappropriate shareholder primacy use the book is centred around a discussion of the shareholder primacy paradigm its legal position and its unsuitability for modern global business Going beyond solely legal analysis juxtaposing legal principles and argumentation with economic theoretic approaches and more importantly real life examples this book is accessible to both professionals and academics working within the fields of business economics corporate governance and corporate law *Telecommunication Journal* ,1989 Evolution of Management Practice J. *Interlocking Global Business Systems* Edward B. Flowers, Thomas P. Chen, Jonchi Shyu, 1999-06-30 The speed with which business has become globally integrated is impressive and almost frightening Much of this change has come from the Pacific Basin At the same time however the Taiwanese Chinese and Southeast Asians have also suffered from these rapid changes The paranoia associated with rapidly escalating rates of foreign investment in China by a small country like Taiwan for example may provide an index of the anxiety that such change can engender The studies in this collection of research articles provide a considered rational approach to some of these changing patterns of world business economic growth regional trade foreign direct investment capital markets and trade restrictions The patterns of changing interlocking global business systems revealed in these articles are fascinating and reassuring It is interesting and enlightening to see how these Asian business systems interlock where the parallel political systems may be in conflict *Journal of Issues in Technical Teacher Education*, 1997 **Journal of the Senate** Michigan.
