China and the Senkaku/Diaoyu Islands Dispute Balazs Szanto, 2017-12-06 This book examines the Senkaku Diaoyu Islands dispute from a foreign policy perspective focusing on three key stakeholders China Japan and the United States The Senkaku Diaoyu Islands dispute is a prominent territorial dispute between China and Japan This book critically assesses that dispute in a pragmatic policy oriented manner The central question of the work focuses on the various military direct invasion coercion and non military bilateral negotiations binding and non binding third party options and delaying foreign policy avenues available to China to pursue its key interests over the disputed islands To compare and contrast these different options the book employs a qualitative rational choice framework This allows for a critical analysis on the merits and demerits of various options and to anticipate China's potential course of action based on the principle that China is expected to act in a rational manner This research offers two main contributions First it adopts a security focused approach to complement the economic focused works on the subject Second it critically examines the various foreign policy options as opposed to offering an avenue based on purely theoretical assumptions While the work concludes that a delaying status quo approach is rational for all parties involved it highlights alternative policy avenues that can build on the conclusion of the rational choice analysis Through this it seeks to address the possibility of escalation and de escalation on the East China Sea and highlights the critical role pro active foreign policy making plays in averting a negative outcome of the dispute This book
