**Workbook/Study Guide for Use with Managerial Accounting, 6th Canadian Edition** Michael Hockenstein, 2004

Management Accounting Professor Carsten Berkau, 2020-04-20 Management Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years academic teaching experience in Germany and at international universities in South Africa, Malaysia, China, the Netherlands and South Korea. In this text book the application of methods and instruments comes first. Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two points of view: 1. a General Management view with aspects of business planning, cost-volume-profit analysis, degree of operating leverage, mergers and cross border acquisitions and risk valuation; 2. a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting, job order and process costing, activity based costing and multi-level contribution margin Accounting. On the UVK website numerous exam tasks and complete solutions thereto are available in English. *Management Accounting* Don R. Hansen, Maryanne M. Mowen, 2003 Fundamentals of management accounting are introduced in this text for accounting majors and nonmajors with a background in basics of financial accounting. The book remains suitable for self-learning financial accounting by the students and corporate executives. The book is primarily intended for the students of undergraduate and graduate management programmes like MBA, MBA Executive, MBA online, PGDM, BMS and BBA programmes.
